

# OSPF Enhanced Traffic Statistics

---

This document describes new and modified commands that provide enhanced OSPF traffic statistics for OSPFv2 and OSPFv3. The ability to collect and display more detailed traffic statistics increases high availability for the OSPF network by making the troubleshooting process more efficient.

New OSPF traffic statistics are collected and displayed to include the following information:

- OSPF Hello input queue and OSPF process queue status and statistics.
- Global OSPF traffic statistics.
- Per-OSPF-interface traffic statistics.
- Per-OSPF-process traffic statistics.
- [Finding Feature Information, on page 1](#)
- [Prerequisites for OSPF Enhanced Traffic Statistics, on page 1](#)
- [Information About OSPF Enhanced Traffic Statistics, on page 2](#)
- [How to Display and Clear OSPF Enhanced Traffic Statistics, on page 2](#)
- [Configuration Examples for OSPF Enhanced Traffic Statistics, on page 3](#)
- [Additional References, on page 7](#)
- [Feature Information for OSPF Enhanced Traffic Statistics, on page 8](#)

## Finding Feature Information

Your software release may not support all the features documented in this module. For the latest caveats and feature information, see [Bug Search Tool](#) and the release notes for your platform and software release. To find information about the features documented in this module, and to see a list of the releases in which each feature is supported, see the feature information table.

Use Cisco Feature Navigator to find information about platform support and Cisco software image support. To access Cisco Feature Navigator, go to [www.cisco.com/go/cfn](http://www.cisco.com/go/cfn). An account on Cisco.com is not required.

## Prerequisites for OSPF Enhanced Traffic Statistics

OSPFv2 or OSPFv3 must be configured on the router.

# Information About OSPF Enhanced Traffic Statistics

The OSPF enhanced traffic statistics are enabled by default and cannot be disabled.

The detailed OSPF traffic statistics are especially beneficial for troubleshooting the following types of OSPF instabilities:

- OSPF process queue status and statistical information can help the network administrator determine if an OSPF process can handle the amount of traffic sent to OSPF.
- OSPF packet header errors and LSA errors statistics keep a record of different errors found in received OSPF packets.

OSPF enhanced traffic control statistics also monitor the amount of traffic control exchanged between OSPF processes--an important consideration in network environments with slow links and frequent topology changes.

## How to Display and Clear OSPF Enhanced Traffic Statistics

### Displaying and Clearing OSPF Traffic Statistics for OSPFv2

#### SUMMARY STEPS

1. `enable`
2. `show ip ospf [process-id] traffic[interface-type interface-number]`
3. `clear ip ospf traffic`

#### DETAILED STEPS

|               | Command or Action  | Purpose  |
|---------------|--|--|
| <b>Step 1</b> | <b>enable</b><br><b>Example:</b><br><pre>Router&gt; enable</pre>   | Enables privileged EXEC mode. <ul style="list-style-type: none"> <li>• Enter your password if prompted.</li> </ul> |
| <b>Step 2</b> | <b>show ip ospf [process-id] traffic[interface-type interface-number]</b><br><b>Example:</b><br><pre>Router# show ip ospf 10 traffic gigabitethernet 0/0/0</pre> | Displays OSPFv2 traffic statistics.  |
| <b>Step 3</b> | <b>clear ip ospf traffic</b><br><b>Example:</b><br><pre>Router# clear ip ospf traffic</pre>  | Clears OSPFv2 traffic statistics.  |

## Displaying and Clearing OSPF Traffic Statistics for OSPFv3

### SUMMARY STEPS

1. enable
2. show ipv6 ospf [*process-id*] traffic[*interface-type interface-number*]
3. clear ipv6 ospf traffic

### DETAILED STEPS

|        | Command or Action  | Purpose  |
|--------|--|--|
| Step 1 | <b>enable</b><br><b>Example:</b><br>Router> enable   | Enables privileged EXEC mode. <ul style="list-style-type: none"> <li>• Enter your password if prompted.</li> </ul> |
| Step 2 | <b>show ipv6 ospf [<i>process-id</i>] traffic[<i>interface-type interface-number</i>]</b><br><b>Example:</b><br>Router# show ipv6 ospf traffic | Displays OSPFv3 traffic statistics.  |
| Step 3 | <b>clear ipv6 ospf traffic</b><br><b>Example:</b><br>Router# clear ipv6 ospf traffic   | Clears OSPFv3 traffic statistics.  |

## Configuration Examples for OSPF Enhanced Traffic Statistics

### Example Displaying and Clearing Enhanced Traffic Statistics for OSPFv2

The following example shows display output for the **show ip ospf traffic** command for OSPFv2:

```
Router# show ip ospf traffic
OSPF statistics:
  Rcvd: 55 total, 0 checksum errors
        22 hello, 7 database desc, 2 link state req
        6 link state updates, 6 link state acks
  Sent: 68 total
        45 hello, 7 database desc, 2 link state req
        10 link state updates, 4 link state acks
        OSPF Router with ID (10.1.1.1) (Process ID 8)
OSPF queues statistic for process ID 8:
  OSPF Hello queue size 0, no limit, drops 0, max size 0
  OSPF Router queue size 0, limit 200, drops 0, max size 0
Interface statistics:
  Interface GigabitEthernet0/0/1
OSPF packets received/sent
  Type           Packets           Bytes
```

## Example Displaying and Clearing Enhanced Traffic Statistics for OSPFv2

```

Authentication 0,
OSPF LSA errors
Type 0, Length 0, Data 0, Checksum 0,

```

The network administrator can issue the **clear ip ospf traffic** command to reset all counters and restart all statistics collections:

```
Router# clear ip ospf traffic
```

## Example Displaying and Clearing Enhanced Traffic Statistics for OSPFv3

The following example shows display output for the **show ipv6 ospf traffic** command for OSPFv3:

```
Router# show ipv6 ospf traffic

OSPFv3 statistics:
  Rcvd: 32 total, 0 checksum errors
        10 hello, 7 database desc, 2 link state req
        9 link state updates, 4 link state acks
        0 LSA ignored
  Sent: 45 total, 0 failed
        17 hello, 12 database desc, 2 link state req
        8 link state updates, 6 link state acks
        OSPFv3 Router with ID (10.1.1.4) (Process ID 6)
OSPFv3 queues statistic for process ID 6
  Hello queue size 0, no limit, max size 2
  Router queue size 0, limit 200, drops 0, max size 2
Interface statistics:
  Interface Serial2/0/0
OSPFv3 packets received/sent
  Type           Packets           Bytes
  RX Invalid     0                 0
  RX Hello       5                 196
  RX DB des      4                 172
  RX LS req      1                 52
  RX LS upd      4                 320
  RX LS ack      2                 112
  RX Total       16                852
  TX Failed      0                 0
  TX Hello       8                 304
  TX DB des      3                 144
  TX LS req      1                 52
  TX LS upd      3                 252
  TX LS ack      3                 148

## Feature Information for OSPF Enhanced Traffic Statistics

The following table provides release information about the feature or features described in this module. This table lists only the software release that introduced support for a given feature in a given software release train. Unless noted otherwise, subsequent releases of that software release train also support that feature.

Use Cisco Feature Navigator to find information about platform support and Cisco software image support. To access Cisco Feature Navigator, go to [www.cisco.com/go/cfn](http://www.cisco.com/go/cfn). An account on Cisco.com is not required.

**Table 1: Feature Information for OSPF Enhanced Traffic Statistics for OSPFv2 and OSPFv3**

| Feature Name   | Releases                 | Feature Information  |
|--|--------------------------|--|
