

# SNMP Support for VLAN Subinterfaces

---

This feature module describes the SNMP Support for VLAN Subinterfaces feature. It includes information on the benefits of the new feature, supported platforms, supported standards, and the commands necessary to configure the SNMP Support for VLAN Subinterfaces feature.

The SNMP Support for VLAN Subinterfaces feature provides mib-2 interfaces sparse table support for Fast Ethernet subinterfaces. This enhancement is similar to the functionality supported in Frame Relay subinterfaces.

## Finding Feature Information

Your software release may not support all the features documented in this module. For the latest caveats and feature information, see [Bug Search Tool](#) and the release notes for your platform and software release. To find information about the features documented in this module, and to see a list of the releases in which each feature is supported, see the feature information table.

Use Cisco Feature Navigator to find information about platform support and Cisco software image support. To access Cisco Feature Navigator, go to [www.cisco.com/go/cfn](http://www.cisco.com/go/cfn). An account on Cisco.com is not required.

## Information About SNMP Support for VLAN Subinterfaces

### Benefits

Sparse table support for the interfaces table on Fast Ethernet subinterfaces provides customers accustomed to Frame Relay subinterfaces the same functionality.

## Supported Platforms

- Cisco 2600 series
- Cisco 3600 series
- Cisco 4000-m series
- Cisco 7200 series
- Cisco 7500 series

# How to SNMP Support for VLAN Subinterfaces

## Enabling the SNMP Agent on VLAN Subinterfaces

Perform the following task to enable the SNMP agent on VLAN subinterfaces.

### SUMMARY STEPS

1. **enable**
2. **configure terminal**
3. **snmp community *string***
4. **interface *type slot/port***
5. **encapsulation isl *vlan-identifier***
6. **ip address *ip-address mask***
7. **end**
8. **show vlans**

### DETAILED STEPS

	Command or Action	Purpose
<b>Step 1</b>	<b>enable</b>  <b>Example:</b> Router> enable	Enables privileged EXEC mode.  • Enter your password if prompted.
<b>Step 2</b>	<b>configure terminal</b>  <b>Example:</b> Router# configure terminal	Enters global configuration mode.

	Command or Action	Purpose
<b>Step 3</b>	<b>snmp community</b> <i>string</i>  <b>Example:</b> Router(config)# <b>snmp community public</b>	Enables the SNMP agent for remote access.
<b>Step 4</b>	<b>interface</b> <i>type slot/port</i>  <b>Example:</b> Router(config)# <b>interface</b> FastEthernet 0/1.1	Selects a particular Fast Ethernet interface for configuration.
<b>Step 5</b>	<b>encapsulation isl</b> <i>vlan-identifier</i>  <b>Example:</b> Router(config-if)# <b>encapsulation isl</b> 10	Enables the Inter-Switch Link.
<b>Step 6</b>	<b>ip address</b> <i>ip-address mask</i>  <b>Example:</b> Router(config)# <b>ip address</b> 192.168.10.1 255.255.255.0	Sets a primary or secondary IP address for an interface.
<b>Step 7</b>	<b>end</b>  <b>Example:</b> Router(config-if)# <b>end</b>	Returns to privileged EXEC mode.
<b>Step 8</b>	<b>show vlans</b>  <b>Example:</b> Router# <b>show vlans</b>	Displays VLAN subinterfaces.

# Configuration Examples for SNMP Support for VLAN Subinterfaces

## Example Enabling the SNMP Agent for VLAN Subinterfaces

The following configuration example shows you how to enable the SNMP agent on the router with VLAN subinterfaces to monitor the SNMP application remotely:

```
snmp community public
!
interface FastEthernet4/0.100
 encapsulation isl 100
 ip address 192.168.10.21 255.255.255.0
!
interface FastEthernet4/0.200
 encapsulation isl 200
 ip address 172.21.200.11 255.255.255.0
!
interface FastEthernet4/1.1
 encapsulation isl 10
 ip address 171.69.2.111 255.255.255.0
```

## Feature Information for SNMP Support for VLAN Subinterfaces

The following table provides release information about the feature or features described in this module. This table lists only the software release that introduced support for a given feature in a given software release train. Unless noted otherwise, subsequent releases of that software release train also support that feature.

Use Cisco Feature Navigator to find information about platform support and Cisco software image support. To access Cisco Feature Navigator, go to [www.cisco.com/go/cfn](http://www.cisco.com/go/cfn). An account on Cisco.com is not required.

**Table 1: Feature Information for SNMP Support for VLAN Subinterfaces**

<b>Feature Name</b>	<b>Releases</b>	<b>Feature Information</b>
SNMP Support for VLAN Subinterfaces	12.2	The SNMP Support for VLAN Subinterfaces feature provides mib-2 interfaces sparse table support for Fast Ethernet subinterfaces. This enhancement is similar to the functionality supported in Frame Relay subinterfaces.
