

CNS Configuration Agent

Cisco Networking Services (CNS) is a foundation technology for linking users to network services. CNS Software Developers Kit (SDK) accomplishes this linking by making applications network-aware and increasing the intelligence of the network elements. CNS SDK provides building blocks to a range of customers in market segments such as enterprise, service provider, independent software vendors, and system integrators.

The CNS Configuration Agent feature supports routing devices by providing the following:

- Initial configurations
- Incremental (partial) configurations
- Synchronized configuration updates

Configuration Information

Configuration information is included in the “Enabling and Configuring the CNS Agents” and the “Monitoring and Verifying the CNS Agents” sections of the *CNS* document at the following URL:

http://www.cisco.com/univercd/cc/td/doc/product/software/ios122sr/newft/122sra33/sr_cns.htm

Command Reference Information

Command reference information is included in the *Cisco IOS Network Management Command Reference*, Release 12.2SR, at the following URL:

http://www.cisco.com/univercd/cc/td/doc/product/software/ios122sr/ct/srnm_r/index.htm

New or Modified Commands

The following commands are new or modified for this feature:

- **cns config cancel**
- **cns config initial**
- **cns config partial**
- **cns config retrieve**
- **debug cns config**
- **debug cns xml-parser**
- **show cns config**
