

BGP Neighbor Policy

The BGP Neighbor Policy feature introduces new keywords to two **show** commands to display information about local and inherited policies. When BGP neighbors use multiple levels of peer templates, it can be difficult to determine which policies are applied to the neighbor. Inherited policies are policies that the neighbor inherits from a peer-group or a peer-policy template.

Configuration Information

Configuration information is included in the “Configuring a Basic BGP Network” module of the *Cisco IOS BGP Configuration Guide*, Release 12.4T, at the following URL:

http://www.cisco.com/univercd/cc/td/doc/product/software/ios124/124tcg/tbgp_c/t_brbbas.htm

The following sections provide information about this feature:

- Configuring Peer Policy Template Inheritance with the `inherit peer-policy` Command
- Configuring Peer Policy Template Inheritance with the `neighbor inherit peer-policy` Command

For a complete list of features included in the “Configuring a Basic BGP Network” module, see the Feature Information Table located toward the end of the module.

Command Reference Information

Command reference information is included in the *Cisco IOS IP Routing Protocols Command Reference*, Release 12.2SR, at the following URL:

http://www.cisco.com/univercd/cc/td/doc/product/software/ios122sr/ct/sripr_r/index.htm

New or Modified Commands

The following commands are new or modified for this feature:

- **show ip bgp neighbors**
- **show ip bgp template peer-policy**

List of All Release 12.2SR Commands

An alphabetical list of all Cisco IOS Release 12.2SR commands is in the *Cisco IOS Master Commands List*, Release 12.2SR, at the following URL:

<http://www.cisco.com/univercd/cc/td/doc/product/software/ios122sr/122srmdx/122sridx.htm>
