Supported and Interoperable Devices and Software for Cisco Secure Access Control System 5.6

Revised: November 7, 2016

The Cisco Secure Access Control System Release 5.6, hereafter referred to as ACS, works with many devices. You can use this document to find devices and software that ACS 5.6 supports.

For details regarding limitations and known problems, see the Release Notes for Cisco Secure Access Control System 5.6.

This document contains:

- Supported Devices, page 2
- Supported User Repositories, page 3
- Supported 802.1X Clients, page 4
- Supported Browsers, page 5
- Supported Authentication Protocols, page 7
- SNMP Support, page 8
- Syslog Support, page 8
- ACS View 5.6 Database Support, page 8
- Supported VMware Versions, page 8
- Documentation Updates, page 9
- Related Documentation, page 9
- Notices, page 10
- Obtaining Documentation and Submitting a Service Request, page 12
**Supported Devices**

ACS 5.6 supports all devices that implement the authentication, authorization, and accounting (AAA) mechanism similar to Cisco IOS 12.x.

**RADIUS and TACACS+**

ACS fully interoperates with third-party RADIUS and TACACS+ client devices that adhere to the governing protocols. Support for RADIUS and TACACS+ functions, depends on the device-specific implementation. For example, on a specific device:

- TACACS+ might not be available for user authentication and authorization
- RADIUS might not be available for administrative authentication and authorization

For TACACS+ devices, ACS conforms to the TACACS+ protocol as Cisco Systems defined in draft 1.78, which is available at http://www.cisco.com

For RADIUS, ACS conforms to the following Request For Comments (RFC):

- RFC 2138—Remote Authentication Dial In User Service (RADIUS)
- RFC 2139—RADIUS Accounting
- RFC 2865—Remote Authentication Dial In User Service (RADIUS)
- RFC 2866—RADIUS Accounting
- RFC 2867—RADIUS Accounting for Tunnel Protocol Support
- RFC 2868—RADIUS Attributes for Tunnel Protocol Support
- RFC 2869—RADIUS Extensions

For details regarding the implementation of vendor-specific attributes (VSAs), see the User Guide for Cisco Secure Access Control System 5.6.

If ACS is set to operate in FIPS mode, some protocols are not supported. For more information, see the User Guide for Cisco Secure Access Control System 5.6.

Table 1 lists some of the tested network elements that ACS 5.6 supports.

<table>
<thead>
<tr>
<th>Network Elements</th>
<th>Operating System with Version</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cisco 2610</td>
<td>IOS 12.3.17b</td>
</tr>
<tr>
<td>Cisco 3640</td>
<td>IOS 12.3.17b</td>
</tr>
<tr>
<td>Cisco 7200</td>
<td>IOS 12.3.17b</td>
</tr>
<tr>
<td>Cisco 3750</td>
<td>IOS 12.2(25r)</td>
</tr>
<tr>
<td>Catalyst WS-3560-24TS Switch</td>
<td>IOS 12.2(25)-SEC2</td>

</table>

**Supported User Repositories**

ACS 5.6 supports the following external user repositories:

- Windows Active Directory, page 4
- RSA Secure ID Server, page 4
- Radius Token OTP Server, page 4
Windows Active Directory

ACS 5.6 supports all editions of:
- Windows AD 2003
- Windows AD 2003 R2
- Windows AD 2008
- Windows AD 2008 R2
- Windows AD 2012
- Windows AD 2012 R2

Lightweight Directory Access Protocol Server

ACS 5.6 supports Lightweight Directory Access Protocol (LDAP) servers. The supported LDAP servers include, but are not limited to:
- SunONE LDAP Directory Server - Version 5.5
- Linux LDAP Directory Server - Version 4.1
- Open LDAP Directory Server

RSA Secure ID Server

ACS 5.6 supports:
- RSA ACE/Server 6.x Series
- RSA Authentication Manager 7.x Series
- RSA 8.x

Radius Token OTP Server

ACS 5.6 supports:
- Any RADIUS RFC 2865-compliant token server
- SafeWord Server

Supported 802.1X Clients

ACS 5.6 supports all 802.1X clients. These include, but are not limited to:
- Cisco AnyConnect 3.0
- Cisco AnyConnect 3.1
- Microsoft Built-In Windows XP 802.1X Client
- Microsoft Built-In Windows Vista 802.1X Client
- Microsoft Built-In Windows 7 802.1X Client
Supported and Interoperable Devices and Software for Cisco Secure Access Control System 5.6

- Microsoft Built-In Windows 8 802.1X Client
- Microsoft Built-In Windows 8.1 802.1X Client
- CSSC version 4.0
- CSSC version 5.0
- Juniper Odyssey 4.0
- Intel Wireless WiFi Link with AMT support
- CSSC SDK for Vista

## Supported Browsers

ACS 5.6 supports the following browser platforms:

- **MAC OS**
  - Mozilla Firefox version 28.0
  - Mozilla Firefox version 29.0
  - Mozilla Firefox version 31.0
  - Mozilla Firefox version 32.0
  - Mozilla Firefox version 33.0
  - Mozilla Firefox version 34.0
  - Mozilla Firefox version 35.0
  - Mozilla Firefox version 36.0
  - Mozilla Firefox version 37.0
  - Mozilla Firefox version 38.0
  - Mozilla Firefox version 39.0
  - Mozilla Firefox version 40.0
  - Mozilla Firefox version 41.0
  - Mozilla Firefox version 42.0
  - Mozilla Firefox version 43.0
  - Mozilla Firefox version 44.0
  - Mozilla Firefox version 45.0
  - Mozilla Firefox version 46.0
  - Mozilla Firefox version 47.0
  - Mozilla Firefox version 48.0
  - Mozilla Firefox version 49.0
  - Mozilla Firefox version 24.4 ESR
  - Mozilla Firefox version 45.0.2 ESR

- **Windows 7 32-bit and 7 64-bit**
  - Internet Explorer version 10.0
  - Internet Explorer version 11.0
- Mozilla Firefox version 17.x
- Mozilla Firefox version 21.x
- Mozilla Firefox version 22.x
- Mozilla Firefox version 25.x
- Mozilla Firefox version 26.x
- Mozilla Firefox version 28.x
- Mozilla Firefox version 29.x
- Mozilla Firefox version 31.x
- Mozilla Firefox version 32.x
- Mozilla Firefox version 33.x
- Mozilla Firefox version 34.x
- Mozilla Firefox version 35.x
- Mozilla Firefox version 36.x
- Mozilla Firefox version 37.x
- Mozilla Firefox version 38.x
- Mozilla Firefox version 39.x
- Mozilla Firefox version 40.x
- Mozilla Firefox version 41.x
- Mozilla Firefox version 42.x
- Mozilla Firefox version 43.x
- Mozilla Firefox version 44.x
- Mozilla Firefox version 45.x
- Mozilla Firefox version 46.x
- Mozilla Firefox version 47.x
- Mozilla Firefox version 48.x
- Mozilla Firefox version 49.x
- Mozilla Firefox version 17.0.6 ESR
- Mozilla Firefox version 24.1.1 ESR
- Mozilla Firefox version 24.4 ESR
- Mozilla Firefox version 24.5 ESR
- Mozilla Firefox version 24.7.0 ESR
- Mozilla Firefox version 31.0 ESR
- Mozilla Firefox version 45.0.2 ESR

- Windows 8.x
  - Internet Explorer version 11.x
  - Mozilla Firefox version 31.x
  - Mozilla Firefox version 32.x
  - Mozilla Firefox version 33.x
Supported Authentication Protocols

ACS 5.6 supports the following protocols:

- PAP/ASCII
- EAP-MD5
- EAP-TLS
- PEAP (with inner EAP-MSCHAPv2/EAP-GTC/EAP-TLS)
- EAP-FAST (with inner EAP-MSCHAPv2/EAP-GTC)
- TACACS+ (PAP/CHAP/MSCHAP)
- LEAP

Note: Mozilla Firefox version 46.x or later is supported only after installing ACS 5.6 patch 5 or later.

Note: You can launch the ACS web interface using IPv6 addresses only in Internet Explorer 7.x or later and Mozilla Firefox 3.x versions.
- CHAP
- MSCHAP (v1)
- MSCHAP (v2)

**SNMP Support**

ACS 5.6 supports Simple Network Management Protocol (SNMP) to provide logging services. The SNMP agent provides read-only SNMPv1 and SNMPv2c support. The supported MIBs include:

- SNMPv2-MIB
- RFC1213-MIB (MIB II)
- IF-MIB
- IP-MIB
- TCP-MIB
- UDP-MIB
- CISCO-CDP-MIB
- ENTITY-MIB

**Syslog Support**

ACS 5.6 conforms to syslog standards (RFC 3164 and RFC 5424) and supports any generic syslog server. In addition, ACS supports the following:

- Syslog over TCP follows the standards of RFC 6587.
- Syslog over TLS (Secure TCP) follows the standards of RFC 5425.

**ACS View 5.6 Database Support**

In ACS View 5.6, the following can be used as the remote database:

- Microsoft SQL Server 2012 R2
- Microsoft SQL Server 2008 R2
- Oracle Database 12c

**Supported VMware Versions**

ACS 5.6 can be installed on the VMware ESXi 5.0, ESXi 5.0 Update 2, ESXi 5.1, ESXi 5.5, and ESXi 5.5 Update 1 versions.
For information on the VMware machine requirements and installation procedures, refer to Installing ACS in a VMware Virtual Machine chapter in the Installation and Upgrade Guide for Cisco Secure Access Control System 5.6.

**Notices**

The following notices pertain to this software license.

**OpenSSL/Open SSL Project**

This product includes software developed by the OpenSSL Project for use in the OpenSSL Toolkit (http://www.openssl.org/).

This product includes cryptographic software written by Eric Young (eay@cryptsoft.com).

This product includes software written by Tim Hudson (tjh@cryptsoft.com).

**License Issues**

The OpenSSL toolkit stays under a dual license, i.e. both the conditions of the OpenSSL License and the original SSLeay license apply to the toolkit. See below for the actual license texts. Actually both licenses are BSD-style Open Source licenses. In case of any license issues related to OpenSSL please contact openssl-core@openssl.org.

**OpenSSL License:**

1. Redistributions of source code must retain the copyright notice, this list of conditions and the following disclaimer.

2. Redistributions in binary form must reproduce the above copyright notice, this list of conditions, and the following disclaimer in the documentation and/or other materials provided with the distribution.

3. All advertising materials mentioning features or use of this software must display the following acknowledgment: “This product includes software developed by the OpenSSL Project for use in the OpenSSL Toolkit (http://www.openssl.org/)”.

4. The names “OpenSSL Toolkit” and “OpenSSL Project” must not be used to endorse or promote products derived from this software without prior written permission. For written permission, please contact openssl-core@openssl.org.

5. Products derived from this software may not be called “OpenSSL” nor may “OpenSSL” appear in their names without prior written permission of the OpenSSL Project.

6. Redistributions of any form whatsoever must retain the following acknowledgment:
“This product includes software developed by the OpenSSL Project for use in the OpenSSL Toolkit (http://www.openssl.org/)”.

THIS SOFTWARE IS PROVIDED BY THE OpenSSL PROJECT “AS IS” AND ANY EXPRESSED OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED. IN NO EVENT SHALL THE OpenSSL PROJECT OR ITS CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

This product includes cryptographic software written by Eric Young (eay@cryptsoft.com). This product includes software written by Tim Hudson (tjh@cryptsoft.com).

Original SSLeay License:

Copyright © 1995-1998 Eric Young (eay@cryptsoft.com). All rights reserved.

This package is an SSL implementation written by Eric Young (eay@cryptsoft.com).

The implementation was written so as to conform with Netscape's SSL.

This library is free for commercial and non-commercial use as long as the following conditions are adhered to. The following conditions apply to all code found in this distribution, be it the RC4, RSA, lhash, DES, etc., code; not just the SSL code. The SSL documentation included with this distribution is covered by the same copyright terms except that the holder is Tim Hudson (tjh@cryptsoft.com).

Copyright remains Eric Young’s, and as such any Copyright notices in the code are not to be removed. If this package is used in a product, Eric Young should be given attribution as the author of the parts of the library used. This can be in the form of a textual message at program startup or in documentation (online or textual) provided with the package.

Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

1. Redistributions of source code must retain the copyright notice, this list of conditions and the following disclaimer.
2. Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.
3. All advertising materials mentioning features or use of this software must display the following acknowledgement:
   “This product includes cryptographic software written by Eric Young (eay@cryptsoft.com)”.
   The word ‘cryptographic’ can be left out if the routines from the library being used are not cryptography-related.
4. If you include any Windows specific code (or a derivative thereof) from the apps directory (application code) you must include an acknowledgement: “This product includes software written by Tim Hudson (tjh@cryptsoft.com)”.
