# Add worker

This section contains the following topics:

## Add Worker

This section explains how to create a worker in CWM.

**Before you begin**

• You should have added and deployed adapter(s).

**Step 1** In the CWM, click the **Admin** tile from the navigation menu on the left. In the **Workers** view, click **Add Worker**.

**Step 2** In the **Create new worker** panel, provide the required input:

a) **Worker name**: type a name for your worker, for example, `MyNewWorker`. Once created, it cannot be modified.

b) **Start worker after creation**: tick the checkbox to automatically start the worker.

c) **Activities**: tick the checkboxes for selected adapters' activities you want to assign to your worker. In our example, a worker for the Generic Rest adapter's activities is created.

*Figure 1: Create Worker*

**Step 3**      Click **Create worker**.
