

Report Settings

This chapter provides information on the system preference the user can specify for Reports Management with Cisco Prime LMS 4.1.

This chapter has the following sections:

- [Set Report Publish Path](#)
- [Email Settings](#)

Set Report Publish Path

Cisco Prime LMS 4.1 allows you to publish the PDF, HTML and CSV format of all the reports to a directory location of your choice. This is done by setting a default directory path.

To set a report publish location:

Step 1 Select **Reports > Report Settings > Report Publish Path**

The Default Report Publish Location page appears, displaying Default Location Settings dialog box.

Note Cisco Prime LMS does not support Japanese characters and special characters such as, \ / : * ? “ < > . ! % in the file or folder name.

[Table 11-1](#) describes the field in the Default Location Settings dialog box.

Table 11-1 Report Publish Path Details

Field/Button	Description
Report Location	Directory path where the reports are published. Use the Browse button to select a directory path. The Server Side File Browser dialog box is launched. You can select the directory path in this dialog box.

Step 2 Click **Browse**.

The Server Side File Browser dialog box appears.

Step 3 Select the directory path from the Server Side File Browser dialog box.

Step 4 Click **OK**.

The directory path is displayed in the Report Location field.

Step 5 Click **Apply** to save the default directory path settings or **Cancel** to reset the directory path.

Note

All versions of Microsoft Excel other than Microsoft Excel 2007 are unable to open CSV files with more than 65,536 rows. If the exported report contains records more than 65,536 rows, an error message appears and the top 65,536 rows are displayed.

Email Settings

You can configure system-wide information on the LMS server using the Email Settings option. It is a way to centrally locate information that is used by Cisco Prime applications.

[Table 11-2](#) describes the field in the Default Location Settings dialog box.

Table 11-2 *Email Settings Fields*

Field	Description
SMTP Server	System-wide name of the SMTP server used by Cisco Prime applications to deliver reports. The default server name is localhost.
Administrator E-mail ID	Cisco Prime Administrator's e-mail ID. This e-mail address is used as the From Address in all mails sent from LMS server. There is no default e-mail ID.
Enable E-mail Attachment	Allows you to enable e-mail attachments in the mails sent from LMS server. This option helps you to attach PDF or CSV reports with the e-mail after the scheduled jobs have completed. This option is disabled by default.
Maximum Attachment Size	Maximum size of the e-mail attachments that are allowed to be sent from LMS server. You can specify the attachment size in KB or MB.

Step 1 Select **Reports > Report Settings > Email Settings**.

The Email Settings dialog box appears.

Step 2 Enter the following information:

- SMTP Server
- Administrator E-mail ID
- Maximum Attachment Size

Step 3 Check the Enable E-mail Attachment check box to enable the scheduled report to be sent as an attachment.

- Step 4** Click **Apply** after making the changes.
To cancel the changes, click **Cancel**.

**Note**

If the PDF file size exceeds the Maximum Attachment size, the URL link of the report is sent as an e-mail. You can click the URL link to view the report.
