

Preface

Cisco Prime LAN Management Solution (LMS) provides you with powerful features that enable you to configure, monitor, troubleshoot, and administer Cisco networks.

Cisco Prime LMS 4.2 has a new menu layout that facilitates access to information and to tools required for managing your network.

Cisco Prime LMS 4.2 groups the options to the following underlying core functions in this release:

- Monitoring
- Inventory Management
- Configuration
- Reporting
- Administration
- Work Center Management

This guide provides you with information on the Configuration Management function in Cisco Prime LMS.

This preface lists related documents that support the Configuration Management function, and demonstrates the styles and conventions used in this guide. The preface contains the following sections:

- [Audience](#)
- [Document Conventions](#)
- [Product Documentation](#)

Audience

This guide is for users who are skilled at network administration and management, and for network operators who can use this guide to make configuration changes to devices, using LMS. The network administrators or the operators should be familiar with the following:

- Basic Network Administration and Management
- Basic Solaris and Soft Appliance System Administration
- Basic Windows System Administration
- Basic LMS Administration

Document Conventions

Table 1 describes the conventions followed in the user guide.
