Getting Started

This driver release supports the current release of CiscoWorks Network Compliance Manager (NCM). Please see the CiscoWorks Network Compliance Manager (NCM) Driver Pack Bulletin for a list of new and enhanced drivers in this driver release.

Before running the driver installers, make sure to backup the contents of the folder where your drivers are located. The default locations are:

- Windows: `\install_directory\server\lib\drivers`
- Solaris: `/install_directory/server/lib/drivers`
- Linux: `/install_directory/server/lib/drivers`

Note

- It is recommended that you have a current backup of your database and system before performing any modifications or upgrades.
- It is recommended to schedule a checkpoint snapshot after the driver pack update.

Installing Device Drivers on Windows Platform

To install the device drivers on a Windows platform:

-
- Step 1** On the CiscoWorks NCM server, run `cwncm16-18_driver_7269-091012_win-K9.exe` (NCM 1.6 - 1.8 installations).
 - Step 2** Click **Next** on the Introduction page.
 - Step 3** Click **Install** on the Pre-Installation Summary page.
 - Step 4** Click **Yes** to reload the drivers.
A Web page opens displaying the login screen of your NCM server.
 - Step 5** Login to the CiscoWorks NCM server using the Admin account.
 - Step 6** Choose **Admin > Start/Stop Services**.
 - Step 7** On the Start/Stop Services page, click the **Reload Drivers** button.
 - Step 8** Click **OK** to reload the drivers.
-

Installing Device Drivers on Solaris Platform

To install the device drivers on a Solaris platform:

-
- Step 1** On the CiscoWorks NCM server, run `cwncm16-18_driver_7269-091012_sol-K9.bin` by executing the following command:

```
/bin/sh cwncm16-18_driver_7269-091012_sol-K9.bin
```

You can also move the `.bin` file to execute mode and execute the `.bin` file by using the following commands:

```
chmod +x cwncm16-18_driver_7269-091012_sol-K9.bin
```

```
sh cwncm16-18_driver_7269-091012_sol-K9.bin
```

The device driver CLI installer will be launched.

Step 2 Press **Enter**.

The device driver install wizard will appear.

We recommend that you quit all programs before continuing with this installation.

Step 3 Press **Enter**.

Step 4 Enter either:

- **y** to overwrite the Nmap files in `/opt/CWNCM/server/ext/nmap/`
or
- **n** to retain the current version of Nmap files.

Pre-installation summary will be displayed.

Step 5 Verify the pre-installation summary and press **Enter**.

Step 6 Enter the CiscoWorks NCM username and password to reload the device drivers.

Step 7 Press **Enter** to exit the installer.

Installing Device Drivers on Linux Platform

To install device drivers on a Linux platform:

Step 1 On the CiscoWorks NCM server, run `cwncm16-18_driver_7269-091012_lnx-K9.bin` by executing the following command:

```
/bin/sh cwncm16-18_driver_7269-091012_lnx-K9.bin
```

You can also move the `.bin` file to execute mode and execute the `.bin` file by using the following commands:

```
chmod +x cwncm16-18_driver_7269-091012_lnx-K9.bin
```

```
./cwncm16-18_driver_7269-091012_lnx-K9.bin
```

The device driver CLI installer will be launched.

Step 2 Press **Enter**.

The device driver install wizard will appear.

We recommend that you quit all programs before continuing with this installation.

Step 3 Press **Enter**.

Step 4 Enter either:

- **y** to overwrite the Nmap files in `/opt/CWNCM/server/ext/nmap/`
or
- **n** to retain the current version of Nmap files.

Pre-installation summary will be displayed.

Step 5 Verify the pre-installation summary and press **Enter**.

Updated and Enhanced Device Driver Support

This device driver release includes the following:

- Issue with Driver pack fails to install on RHEL6 64-bit systems with "bad ELF interpreter: No such file or directory" is now resolved. [107298]
- Cisco Nexus driver now supports installation of a third image on the Nexus Switch. [104939]
- Cisco Nexus driver now supports "show running-config all" command.[107766, 107767]
- Driver discovery issue with Cisco 4948E has been resolved. [107251]
- Snapshot task on Alcatel Lucent Omni switches to synchronize "Certify/Restore Status" is fixed.[107774, 107838]
- Software Upgrade Feature Support has been added to ApresiaLight APLGM110GTSS and Apresia 13100-48X-PSR.[106555, 106557]
- Deploy to running config feature is now available for ApresiaLight APLGM110GTSS.[107543]
- Deploy binary config feature is now available for Nortel: NortelERS45xx driver. [106627, 107678]
- F5 driver now shows the real system uptime.[102131]
- Driver discovery issue with Cisco 871w is now resolved.[105907]
- Driver for Juniper SA 2000 now fetches the device certificates and licenses into NAI105711
- Software upgrade issue with Cisco WS-3550 & 3560 is resolved. [77863]
- HP Procurve driver now supports IPv6 for the models 5406zl, 6600ml-24G-4XG and 3800-24G-2XG on OS versions respectively.[107600]
- Driver Discovery issues with Cisco Nexus5020 and 7000 series switches is now resolved. [107206]
- Scheduled snapshots for Avaya ERS 5510-48T v6.2.4 switches now works fine.[106243]
- Nexans Fiberswitch driver now doesnot use the same tmp.cfg for similar device group tasks.[107295]
- The device family name of for riverbed devices is reverted back to riverbed.[107084]
- Driver for Cisco CRS, GSR 12K, and ASR 9K series Routers does not capture time stamps in the configuration.[107207]
- SNAPSHOT ERROR due to unable to get into CUE exec mode is now resolved. [106459]
- Snapshot parsing issue with Cisco WLAN controller is now resolved. [105443]
- Invalid configuration captured issue with the Huawei driver is fixed.[105880]
- Syntax error with getconfiguration_tftp for CiscoFWSM_RawData_UpdaterScript.xml is fixed.[107507]
- CiscoNexus - the parser now does not ignore the config "interface" sections.[107028]
- Snapshot failing issue on Motorola Vanguards is fixed.[106877]
- Issue with parsing module slot numbers in CiscoCatNative driver is resolved.[106613]
- The <more> prompt for NCM Module diagnostic for Junos10 driver is cleaned up.[106239]
- Command script issue with Huawei driver is now resolved.[107723]
- Syntax error in CiscoIOS_JS driver in module.js is fixed.[107721]
- Software upgrade issue with "atalyst 4000, 4500, 4900, & 6000 series, native mode, & IE-3000 switches, IOS version 12.x" driver is resolved. [106538]

- The driver for HP VCFlex10 Module now parses for the correct serial number.[106238]
- CMTS' Syslog detection pattern is resolved. [106241]
- Issue with Config Changes Detection in Juniper devices is resolved.[106011]
- Fujitsu Primergy driver now parses hostnames correctly.[107603]
- CiscoCatalyst driver now reports correct speed information in duplex diagnostic.[107509]
- Juniper Routing diagnostic runs "show route " command when BGP fails.[107534]
- AlcatelLucent OmniSwitch driver now parses Power Supply modules that are not attached to a slot number. [16880]
- The driver for HP 5120 switch now runs diagnostics in the exec mode. [107349]
- Driver for BIG-IP LTM 1600 now supports CLI mode. [90790]

Known Limitations and Problems

This section contains information about the limitations and problems known to exist in this device driver release.

Table 7 Known Limitations and Problems

Description	Workaround
The VMware Distributed vSwitch driver depends on a newer Java library that is present in CWNCM version 1.6.3.	Other versions must have the latest vim25.jar file (available from VMware) copied to <system install directory>\server\ext\jboss\server\default\lib for this driver to be functional.
The driver support for Nexus 5k/1k [Nexus5000.rdp] and Nexus 7k [CiscoNexus.rdp] devices have been consolidated into a single driver package - CiscoNexus.rdp. The driver installer does not remove the existing Nexus5000.rdp file or reassign devices to use the new driver.	The Nexus5000.rdp file resident in The Driver Discovery via CLI for Cisco Nexus fails <i>install_directory/server/lib/drivers</i> should be manually removed, and all affected devices should be rediscovered. CiscoWorks NCM will assign the consolidated driver upon correct discovery.

Table 7 **Known Limitations and Problems (continued)**

Description	Workaround
The driver support for Blade Network Technologies Rack Switch G8000 [EXT_BNT_RackSwitch_G8000.rdp] and Rack Switch G8124 [EXT_BNT_RackSwitch_G8124.rdp] have been consolidated into a single driver package - EXT_BNT_RackSwitch.rdp. The driver installer does not remove the existing EXT_BNT_RackSwitch_G8000.rdp and EXT_BNT_RackSwitch_G8124.rdp files or reassign devices to use the new driver.	The files (EXT_BNT_RackSwitch_G8000.rdp & EXT_BNT_RackSwitch_G8124.rdp) resident in <i>install_directory/server/lib/drivers</i> should be manually removed, and all affected devices should be rediscovered. CiscoWorks NCM will assign the consolidated driver upon correct discovery.
Cisco Firewall Services Module (FWSM) series standalone or administration context devices: First discovery task fails after adding the device. However, the second discovery task will succeed.	Either re-run the task or assign the driver to the device.
The Device Driver Reference (Configuration_Guide.pdf) is obsolete and has been deprecated. The information is included in the User Guide and the Upgrade and Installation Guide.	Consult the User's Guide and the Upgrade and Installation Guide for product information.
The initial discovery task for some Cisco FWSM Admin and Standalone Context devices may fail.	Either re-run the task or assign the driver to the device.
CLI Driver Discovery and the CLI Snapshot features are not supported with the Open Gear Driver.	None
Configuration Deploy feature is not supported in Avaya 1004, 3120 & 4134 devices. Also for Avaya 3120 SNMP Driver Discovery and Device Boot Diagnostic are not supported.	None

**Note**

- Starting with July '12 Driver pack, the Supported Devices List conforms to the Cisco Networking site with respect to device-naming conventions for (ProCurve) devices.
- It is recommended that you have a current backup of your database and system before performing any modifications or upgrades.
- It is recommended to schedule a checkpoint snapshot after the driver pack update.
- Consult the User's Guide and the Upgrade and Installation Guide for product information. To check for recent updates, or to verify that you are using the most recent edition of a document, go to: http://www.cisco.com/en/US/products/ps6923/products_documentation_roadmaps_list.html
