

CHAPTER 7

Namespace Manager

The Namespace Manager provides a GUI for managing the system namespace known as “config,” which contains the set of Cisco standardized events, such as `com.cisco.cns.mgmt.config.load`, etc. By default, each event defines a mapping to itself for both the publish and subscribe mapping.

If you are using the *Cisco Configuration Engine Software Development Kit API Reference and Programmer Guide* to develop your own application, you are free to redefine the map according to your application needs. Additional application-specific namespace values can be defined by means of the Cisco Configuration Engine SDK.

Note

Cisco Configuration Engine supports multiple namespaces and their respective mappings by means of the Cisco Configuration Engine GUI.

The system namespace is guaranteed to return a mapping even for undefined events; in which case, the input map is returned as the output map. This is a requirement for supporting future devices which might depend on new events that are not currently defined.

To access Namespace management tasks, log into the system (see “[Logging In](#)” section on page 2-1). Then, from the Home page, click the **Tools** tab. The Tools page appears.

From the Tools page, click **Namespace Mgr**. The Namespace Management page appears showing:

- View Events
- Add Events
- Edit Events
- Delete Events

Viewing Events

From the Namespace Manager main page, click **View Events**. The events list for the current application (config) appears (see [Figure 7-1](#)).

■ Adding Events**Figure 7-1 Events List****Application Details: config****Events in the Application:**

cisco.mgmt.cns.config-changed	cisco.mgmt.cns.device.disconnect	cisco.mgmt.cns.device.connect
cisco.cns.config.reboot	cisco.mgmt.cns.event.boot	cisco.cns.config-changed
cisco.cns.config.load	cisco.mgmt.cns.inventory.get	cisco.mgmt.cns.config.sync-status
cisco.cns.device.connect	cisco.cns.exec.cmd	cisco.cns.exec.reload
cisco.mgmt.cns.image.checkServer	cisco.mgmt.cns.exec.cmd	cisco.mgmt.cns.config.load
cisco.mgmt.cns.config.complete	cisco.cns.exec.rsp	cisco.mgmt.cns.exec.reload
cisco.cns.config.id-changed	cisco.cns.config.complete	cisco.mgmt.cns.exec.rsp
cisco.mgmt.cns.image.status	cisco.cns.inventory.oir	cisco.mgmt.cns.image.deleteRequest
cisco.mgmt.cns.config.reboot	cisco.mgmt.cns.reloadNotify	cisco.mgmt.cns.inventory.device-details
cisco.mgmt.cns.config.failure	cisco.mgmt.cns.image.deleteResponse	cisco.mgmt.cns.image.upgradeRequest
cisco.cns.config.sync-status	cisco.mgmt.cns.config.warning	cisco.mgmt.cns.config-changed.lost
cisco.cns.config.failure	cisco.cns.inventory.get	cisco.cns.event.boot
cisco.mgmt.cns.config.id-changed	cisco.mgmt.cns.image.inventoryRequest	cisco.cns.inventory.device-details
cisco.cns.config-changed.lost	cisco.cns.reloadNotify	cisco.cns.config.warning
cisco.cns.device.disconnect	cisco.mgmt.cns.event.id-changed	cisco.cns.event.id-changed
cisco.mgmt.cns.inventory.oir		

129368

Adding Events

The events list for the current application (config) appears (see [Figure 7-1](#)).

- Step 1** From the Namespace Manager main page, click **Add Events**.

The Event information page appears (see [Figure 7-2](#)).

Figure 7-2 Event Information Page**Add Event to Application: config**

Event Name (required)	<input type="text"/>
NSM Mode	Algorithmic
Event Mapping (required)	<input type="text"/>
<input type="button" value="Advanced"/>	
<input type="button" value="Add"/> <input type="button" value="Reset"/>	

129369

Step 2 Enter an Event name.

Step 3 Use the drop-down arrow to select the NSM Mode.

- Algorithmic – Mapped events qualified with group name or device name are returned from NSM. This is the preferred mode for all users. It allows you to provision the selected group(s) of device(s).
- Non-Algorithmic – Mapped events are returned from NSM without group name or device name. You are forced to provision all device(s).

Step 4 Enter a valid Event Mapping.

For example: **cisco.mgmt.cns.exec.reload**

Step 5 To define separate parameters for Subscriber Mapping and Publisher Mapping, click **Advanced**.

The advanced event information page appears (see [Figure 7-3](#)).

Figure 7-3 Advanced Event Information Page

Add Event to Application: config

Event Name (required)	<input type="text"/>
Subscriber Default	Algorithmic
Publisher Default	Algorithmic
Subscriber Mapping (required)	<input type="text"/> Remove New Mapping <input type="text"/> Add to list
Publisher Mapping (required)	<input type="text"/> Remove New Mapping <input type="text"/> Add to list
<input type="button" value="Add"/> <input type="button" value="Reset"/>	

129453

Step 6 Enter information in the appropriate fields, then click **Add**.

Editing Events

- Step 1** From the Namespace Manager main page, click **Edit Events**.

The Event information page appears (see [Figure 7-4](#)).

Figure 7-4 Event List to Edit

Edit Events in Application: config

	cisco.mgmt.cns.config-changed		cisco.mgmt.cns.device.disconnect		cisco.mgmt.cns.device.connect
	cisco.cns.config.reboot		cisco.mgmt.cns.event.boot		cisco.cns.config-changed
	cisco.cns.config.load		cisco.mgmt.cns.inventory.get		cisco.mgmt.cns.config.sync-status
	cisco.cns.device.connect		cisco.cns.exec.cmd		cisco.cns.exec.reload
	cisco.mgmt.cns.image.checkServer		cisco.mgmt.cns.exec.cmd		cisco.mgmt.cns.config.load
	cisco.mgmt.cns.config.complete		cisco.cns.exec.rsp		cisco.mgmt.cns.exec.reload
	cisco.cns.config.id-changed		cisco.cns.config.complete		cisco.mgmt.cns.exec.rsp
	cisco.mgmt.cns.image.status		cisco.cns.inventory.oir		cisco.mgmt.cns.image.deleteRequest
	cisco.mgmt.cns.config.reboot		cisco.mgmt.cns.reloadNotify		cisco.mgmt.cns.inventory.device-details
	cisco.mgmt.cns.config.failure		cisco.mgmt.cns.image.deleteResponse		cisco.mgmt.cns.image.upgradeRequest
	cisco.cns.config.sync-status		cisco.mgmt.cns.config.warning		cisco.mgmt.cns.config-changed.lost
	cisco.cns.config.failure		cisco.cns.inventory.get		cisco.cns.event.boot
	cisco.mgmt.cns.config.id-changed		cisco.mgmt.cns.image.inventoryRequest		cisco.cns.inventory.device-details
	cisco.cns.config-changed.lost		cisco.cns.reloadNotify		cisco.cns.config.warning
	cisco.cns.device.disconnect		cisco.mgmt.cns.event.id-changed		cisco.cns.event.id-changed
	cisco.mgmt.cns.inventory.oir		cisco.mgmt.cns.image.oir		cisco.mgmt.cns.image.oir

129370

- Step 2** Click on the Event you want to edit.

The Edit Event parameters page appears (see [Figure 7-5](#)).

Figure 7-5 Edit Event Parameters

Edit Event: cisco.cns.config.load

Subscriber Default <small>(required)</small>	Algorithmic
Publisher Default <small>(required)</small>	Algorithmic
Subscriber Mapping <small>(required)</small>	cisco.mgmt.cns.config.load <input type="button" value="Remove"/> New Mapping <input type="text"/> Add to list
Publisher Mapping <small>(required)</small>	cisco.mgmt.cns.config.load <input type="button" value="Remove"/> New Mapping <input type="text"/> Add to list

Edit Reset

129371

Step 3 Modify all applicable fields, then click **Edit**.

Deleting Events

Step 1 From the Namespace Manager main page, click **Delete Events**.

The Delete Event list page appears (see [Figure 7-6](#)).

<input type="checkbox"/> cisco.mgmt.cns.config.failure	<input type="checkbox"/> cisco.mgmt.cns.image.deleteResponse	<input type="checkbox"/> cisco.mgmt.cns.image.upgradeRequest
<input type="checkbox"/> cisco.cns.config.sync-status	<input type="checkbox"/> cisco.mgmt.cns.config.warning	<input type="checkbox"/> cisco.mgmt.cns.config-changed.lost

129372

Step 2 Check to select the Event(s) you want to delete, then click **Delete**.

A confirmation box appears.

Step 3 To Delete the selected Event(s), click **OK**.
