

ESC System Level Configuration

- [Downloading Logs from the ESC Portal, on page 1](#)

Downloading Logs from the ESC Portal

You can now download all log files from the ESC portal. There are two types of logs:

- Trace logs: This includes vimmanager log, esc_rest log, and esc_netconf log.
- System logs: This includes escmanager log, vimmanager log, and all other ESC related logs except for the trace logs.

Procedure

- Step 1** Choose **System > Logs**.
- Step 2** Click **Request message trace logs** for trace logs, or **Request system logs** for all ESC related logs.
The downloadable file appears (after it is created) in the table.
- Step 3** Click the downloadable file to save it on your machine.
