A

- AAAprompts.properties [9-5](#)
- access control lists
 - assigning to devices [7-18](#)
 - assigning to PAKs [7-26](#)
- adding
 - device groups [7-11](#)
 - devices [7-8](#)
 - policies [8-16](#)
 - user accounts [6-2](#)
- admin, user profile information [6-2](#)
- administrative privileges [2-3](#)
- admin password
 - adding during installation [3-4](#)
 - changing [9-9](#)
- alerts, viewing [6-6](#)
- annotating licenses [8-12](#)
- audit trail logs [6-11](#)
- Audit Trail Report [6-14](#)
- authentication methods [4-6](#)
- autodiscovery of devices [7-2](#)
- automatic upgrade [3-9](#)

B

- backing up multihost CLM databases [9-3](#)
- backing up the database [9-2](#)
- before you begin [4-1](#)

C

- cautions, significance of [i-x](#)

- certificate file, setting installation default [3-7](#)
- checking connectivity [7-18](#)
- Check License Portal [8-15](#)
- checklist, getting started [4-4](#)
- Cisco.com, registering [2-3, A-2](#)
- Cisco IOS dependencies, see your device documentation [2-2](#)
- Cisco license agent on devices [4-1](#)
- Cisco License Manager
 - checking connectivity with license portal [8-15](#)
 - downloading software packages [3-1](#)
 - features [1-2](#)
 - installing by using a CLI script [3-5, 3-7](#)
 - installing by using the GUI [3-2](#)
 - navigating the GUI [5-17](#)
 - overview [1-1](#)
 - reinstalling [3-10](#)
 - uninstalling [3-10](#)
 - updating the trust store with the latest SSL certificate [9-10](#)
 - upgrading automatically from previous release [3-9](#)
- CiscoWork devices, importing into CLM [9-6](#)
- CLI script for installing CLM [3-5, 3-7](#)
- clm.properties [9-10](#)
- clm_import.bat [9-6](#)
- clm_installer.bat [3-3, 3-9](#)
- connection information [5-13](#)
- connection method information [5-13](#)
- conventions [i-x](#)

D

- database, support for external SQL [3-5](#)
- deleting

- devices from inventory [7-10](#)
 - licenses [8-5](#)
 - policies [8-18](#)
 - user accounts [6-6](#)
- deploying licenses [8-5](#)
- Deploy Licenses explorer [5-14](#)
- device
 - autodiscovery [7-2](#)
 - configuration for CLM [2-2, 2-3](#)
 - discovery [7-5](#)
- device authentication, configuring [4-4](#)
- device connection information [5-13](#)
- DeviceExportCSV.bat [9-8](#)
- DeviceExportFromCSV.sh [9-8](#)
- device groups
 - changing passwords globally [7-15](#)
 - working with [7-11](#)
- DeviceImportFromCSV.bat [9-7](#)
- DeviceImportFromCSV.sh [9-7](#)
- device information, polling for [7-17](#)
- device notification [4-1](#)
- device properties, viewing [7-16](#)
- device protocol, reconfiguring [9-9](#)
- devices
 - adding to inventory [7-8](#)
 - assigning access control lists [7-18](#)
 - changing credentials globally [7-15](#)
 - checking connectivity [7-18](#)
 - finding [7-16](#)
- Device Summary Report [6-14](#)
- Discover Device Assistant [7-5](#)
- discovering devices [7-5](#)
 - automatically [7-2](#)
 - concept in CLM [1-5](#)
 - creating properties file for customized TACACS+ and device login prompts [9-5](#)
 - overview [1-5](#)
 - using Discover Device Assistant [7-5](#)
- DNS requirement [2-3](#)

- documentation, conventions [i-x](#)
- downloading CLM software packages [3-1](#)
- dual NIC
 - configuring for [3-4](#)
 - support for [2-2](#)

E

- editing
 - policies [8-18](#)
 - user profile information [6-3](#)
 - user roles [6-5](#)
- e-mail ID, updating profile [4-1](#)
- e-mail server [A-2](#)
- e-mail service
 - installation default [3-7](#)
 - reconfiguring [9-9](#)
 - server installation question about [3-4](#)
- enable passwords
 - configuring in adding a device via the GUI [7-10](#)
 - configuring in Autodiscovery [7-4](#)
 - configuring in Discover Devices Assistant [7-7](#)
- error messages, in dialog boxes [6-12](#)
- error messages, server status [6-10](#)
- expired licenses, viewing [8-14](#)
- expiring features, checking for [6-19](#)
- expiring license, viewing [8-14](#)
- exporting
 - device information to a CSV file [9-8](#)
 - reports to CSV file [6-18](#)

F

- features [1-2](#)
- firewalls
 - allowing the CLM client to connect to the server [9-10](#)
 - gateway device requirements [2-2](#)
 - requirements for [2-3](#)
