

INDEX

A

- additional software requirements [1-11](#)
- address table configuration files, content migration [1-4](#)
- alternate ports, using [1-5](#)

C

- cautions
 - on becoming root user
 - Linux [3-2, 3-3](#)
 - Solaris [2-2](#)
 - on Solaris patches required [2-4](#)
 - required patches [1-9](#)
- Cisco ITP
 - nodes, supported
 - 2600 series routers, 2811 series router, 7200 series routers, 7300 series router, 7500 series router, 7600 series router [1-2](#)
- client, system requirements [1-10](#)
- content, migrated during installation [1-4](#)
- content, preserved [1-4](#)
- creating downloaded client [3-5](#)

D

- default directory, MWTM [2-8](#)
- different machine upgrades [1-5](#)
- DISPLAY variable, setting [2-2](#)
- documentation
 - related [i-ix](#)

E

- error messages, checking
 - Linux [3-7](#)
 - Solaris [2-6](#)

G

- GTT support [1-4](#)

I

- image checking
 - disabling, Solaris [2-5](#)
- installation
 - directory, verifying
 - Linux [3-8](#)
 - Solaris [2-7](#)
 - installation log, viewing
 - Linux [3-5](#)
 - installation methods [1-1](#)
 - installation prerequisites
 - Linux [3-2](#)
 - Solaris [2-2](#)
 - installations on Linux [3-10](#)
 - about [3-1](#)
 - client download, creating [3-5](#)
 - concluding steps [3-5](#)
 - error messages [3-7](#)
 - logs, viewing [3-5](#)
 - process [3-1, 3-2](#)
 - verifying [3-6](#)
 - installations on Solaris

process [2-1](#)
 server and client

server phase [2-2](#)

installing MWTM

Linux client, using webserver [3-5](#)

Linux server [3-2](#)

Linux server, client [3-2](#)

installing MWTM on Windows

using the web server [4-1](#)

IOS images, supported [1-3](#)

IP access list, content migration [1-4](#)

L

licensing information [1-2](#)

Linux

error messages [3-7](#)

Linux update requirements [1-10](#)

log files, content migration [1-4](#)

logs, viewing

Linux [3-5](#)

M

methods of installation [1-1](#)

MIB reference [1-13](#)

migrated content [1-4](#)

MWTM

clients, displaying list of [2-10](#)

content migration [1-4](#)

requirements

client system [1-10](#)

Linux [1-10](#)

server system [1-6](#)

software, additional [1-11](#)

Solaris patches [1-9](#)

root user, becoming

Linux [3-2](#)

root user, logging in as [2-2, 3-2](#)

routers, supported [1-2](#)

route table, content migration [1-4](#)

rpm command [3-7](#)

running uninstall on Linux [3-10](#)

running uninstall on Solaris [2-10](#)

S

same machine upgrades [1-5](#)

security, content migration [1-4](#)

seed node file

- content migration [1-4](#)

server installation

- concluding, Linux [3-5](#)

server system requirements [1-6](#)

SNMP parameters, content migration [1-4](#)

software requirements, additional [1-11](#)

software requirements *see* client system requirements, server system requirements

Solaris

- installation directories, verifying [2-7](#)
- installation prerequisites [2-2](#)

Solaris 10 patches [1-9](#)

Solaris 9 patches [1-9](#)

Solaris patch requirements [1-9](#)

starting

- install tool on Linux [3-3](#)
- install tool on Solaris [2-3](#)

Linux

- after installation [3-8](#)
- MWMT client [3-9](#)

MWMT client on Windows [4-2](#)

MWMT on Linux

- command line [3-8](#)

MWMT on Solaris [2-8](#)

- as final step of installation [2-8](#)
- client, starting [2-8](#)
- command line [2-8](#)
- startup menu [2-8](#)

stopping MWMT installation, Solaris [2-9](#)

supported nodes [1-2](#)

supported OS images [1-3](#)

supported platforms [1-2](#)

system.properties file, content migration [1-4](#)

T

trap access list, content migration [1-4](#)

trap forwarding information, content migration [1-4](#)

troubleshooting commands, content migration [1-4](#)

U

uninstalling MWMT

- client [4-2](#)
- on Linux [3-9, 3-10](#)
- on Solaris [2-9](#)
 - about [2-9](#)
 - uninstall tool, using [2-10](#)

upgrading

- about MWMT [1-3](#)

upgrading to MWMT 6.0, on different machines [1-5](#)

usernames, content migration [1-4](#)

using alternate ports [1-5](#)

V

verifying installation

- on Linux [3-6](#)
