Preface

This guide describes configuring Cisco Network Registrar by using the web-based user interface (web UI) and command line interface (CLI).

Who Should Read This Guide

This guide is designed for network managers who are responsible for maintaining the network Domain Name System (DNS), Dynamic Host Configuration Protocol (DHCP), Trivial File Transfer Protocol (TFTP), and Simple Network Management Protocol (SNMP) servers. The network manager should be familiar with the following topics:

- Basic concepts and terminology used in internetworking
- Network topology and protocols

How This Guide Is Organized

This guide describes how to become familiar with Cisco Network Registrar features so that you can use them to administer network addresses. The parts of this guide are described in the following subsections.

Part 1—Getting Started

Part 1 introduces Cisco Network Registrar, describes the management and protocol components, and describes the user interfaces. This part includes the following chapters:

<table>
<thead>
<tr>
<th>Chapter 1</th>
<th>Cisco Network Registrar Components</th>
<th>Introduces Cisco Network Registrar, its deployment scenarios, and some deployment guidelines.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chapter 2</td>
<td>Cisco Network Registrar User Interfaces</td>
<td>Describes the Cisco Network Registrar management and protocol components.</td>
</tr>
<tr>
<td>Chapter 3</td>
<td>Server Status Dashboard</td>
<td>Describes the Cisco Network Registrar server status dashboard features and functions.</td>
</tr>
<tr>
<td>Chapter 4</td>
<td>Deploying Cisco Network Registrar</td>
<td>Describes the Cisco Network Registrar local and regional web UIs and CLIs.</td>
</tr>
</tbody>
</table>
Part 2—Local and Regional Administration

Part 2 describes how to configure administrators, manage the central configuration, and maintain the servers and databases (including backup and recovery). This part includes the following chapters:

Chapter 5  Configuring Administrators Describes how to configure the local and regional administrators, and provides administration tutorials. It also describes how to manage tenants.

Chapter 6  Managing the Central Configuration Describes how to manage the central network configuration from the regional cluster.

Chapter 7  Maintaining Servers and Databases Describes how to maintain the Cisco Network Registrar servers.

Chapter 8  Backup and Recovery Describes how to back up or recover the databases.

Part 3—Address Management

Part 3 describes how to manage the IP address space and its hierarchy, hosts, Router Interface Configuration (RIC) servers, owners and regions, and reports. This part includes the following chapters:

Chapter 9  Managing Address Space Describes how to manage address space elements known as address blocks and subnets.

Chapter 10  Managing Hosts Describes how to manage network hosts.

Chapter 11  Managing Router Interface Configurations Describes how to manage the RIC server.

Chapter 12  Managing Owners and Regions Describes how to manage network owners and regions.

Chapter 13  Managing Reports Describes how to manage American Registry of Internet Numbers (ARIN) and address allocation reports.

Part 4—Domain and Zone Administration

Part 4 describes how to configure DNS servers, zones, resource records, server attributes, and High Availability (HA) servers. This part includes the following chapters:

Chapter 14  Introduction to the Domain Name System Introduces the Domain Name System (DNS) protocol and its Cisco Network Registrar implementation.

Chapter 15  Managing Zones Describes how to manage DNS zones.

Chapter 16  Managing Resource Records Describes how to manage DNS resource records (RRs).
### Preface

**Part 5—Dynamic Host Administration**

Part 5 describes DHCP and how to configure scopes and leases and their several deployments, IPv6 addresses, clients and client-classes, failover, DNS Update, and special processing using extensions. This part includes the following chapters:

<table>
<thead>
<tr>
<th>Chapter</th>
<th>Title</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>17</td>
<td>Managing DNS Server Properties</td>
<td>Describes how to set more advanced DNS server properties.</td>
</tr>
<tr>
<td>18</td>
<td>Configuring High-Availability DNS Servers</td>
<td>Describes how to configure a High Availability (HA) DNS server.</td>
</tr>
<tr>
<td>19</td>
<td>Introduction to Dynamic Host Configuration</td>
<td>Introduces DHCP and its Cisco Network Registrar implementation.</td>
</tr>
<tr>
<td>20</td>
<td>Configuring Scopes and Networks</td>
<td>Describes how to configure scopes and networks.</td>
</tr>
<tr>
<td>21</td>
<td>Configuring Policies and Options</td>
<td>Describes how to configure policies and options.</td>
</tr>
<tr>
<td>22</td>
<td>Managing Leases</td>
<td>Describes how to manage leases.</td>
</tr>
<tr>
<td>23</td>
<td>Configuring Client-Classes and Clients</td>
<td>Describes how to configure DHCP clients and client-classes.</td>
</tr>
<tr>
<td>24</td>
<td>Using Expressions</td>
<td>Describes how to use expressions for DHCP processing.</td>
</tr>
<tr>
<td>25</td>
<td>Managing DHCPv6 Addresses</td>
<td>Describes how to manage the DHCPv6 address space.</td>
</tr>
<tr>
<td>26</td>
<td>Configuring DHCPv6 Failover</td>
<td>Describes how to configure DHCP failover servers.</td>
</tr>
<tr>
<td>27</td>
<td>Advanced DHCP Server Properties</td>
<td>Describes how to manage the more advanced DHCP server properties.</td>
</tr>
<tr>
<td>28</td>
<td>Configuring DNS Update</td>
<td>Describes how to configure DNS Update for DHCP.</td>
</tr>
<tr>
<td>29</td>
<td>Using Extension Points</td>
<td>Describes how to use extensions for DHCP processing.</td>
</tr>
</tbody>
</table>
Part 6—Virtual Appliance

Part 6 describes virtual appliance and how to configure and manage Cisco Network Registrar virtual appliance. This part includes the following chapters:

Chapter 30  Introduction to Cisco Network Registrar Virtual Appliance  Introduces virtual appliance and its Cisco Network Registrar implementation.

Chapter 31  Managing the Cisco Network Registrar Virtual Appliance  Describes how to manage the Cisco Network Registrar virtual appliance.

Part 7—Appendixes, Glossary, and Index

Part 7 includes appendixes that describe DNS RRs, DHCP options, and the DHCP extension dictionary. This part also includes a glossary and an index.

Appendix A  Resource Records  Describes the DNS RRs.

Appendix B  DHCP Options  Describes the DHCP options.

Appendix C  DHCP Extension Dictionary  Describes the DHCP extension dictionary.

Glossary  Glossary  Glossary of terms used in Cisco Network Registrar.

Index  Index  Index to the guide.

Document Conventions

This guide uses the following documentation conventions.

Formatting

This guide uses the following formatting conventions:

- User input and controls are indicated in **bold**; for example, “enter 1234” and “click **Modify Scope**.”
- Object attributes are indicated in *italics*; for example, “the *failover-safe-period* attribute.”
- Cross-references to chapters or sections of chapters are indicated in **blue** type; for example, “see the “Document Conventions” section on page xxx.”
Navigation and Screens

This guide uses the following navigation and screen display conventions:

- Windows systems use a two-button mouse. To drag and drop an object, click and hold the left mouse button on the object, drag the object to the target location, then release the button.
- Solaris systems use a three-button mouse. To drag and drop an object, click and hold the middle mouse button on the object, drag the object to the target location, then release the button.
- Screen displays can differ slightly from those included in this guide, depending on the system or browser you use.
- Web UI Navigation bar labels can have IPv4 and IPv6 variants depending on the administrator role privileges assigned. To simplify procedural instructions, this User Guide uses the most generic versions of the menu bar labels, unless there is a need to be more specific. For example, the Address Space menu label might be rendered as Address Space v4 and Address Space v6. The instructions will have the label simply as Address Space.

Callouts

Callouts in the text have the following meaning:

- **Caution**
  
  Be careful. The description alerts you to potential data damage or loss.

- **Note**
  
  Take note. The description is particularly noteworthy.

- **Timesaver**
  
  Save time. The description can present a timesaver.

- **Tip**
  
  Consider this helpful hint. The description can present an optimum action to take.
We sometimes update the electronic documentation after original publication. Therefore, you should also review the documentation on Cisco.com for any updates.

Table 1 describes the product documentation that is available. You can view the marketing and user documents for Cisco Network Registrar at: http://www.cisco.com/en/US/products/sw/netmgtsw/ps1982/index.html.
