Preface

This document describes the Cisco Prime Cable Provisioning Application Programming Interface (API) and Provisioning Web Services (PWS), which can be used to integrate Prime Cable Provisioning with Business Support Systems (BSS) and Operational Support Systems (OSS).

Audience

System integrators, network administrators, and network technicians can use this integration guide to integrate the various BSS and OSS with Prime Cable Provisioning. Only experienced users should use these instructions. To use the instructions in this guide, you must be familiar with:

- Prime Cable Provisioning architecture.
- Java programming.

Product Documentation

Note We sometimes update the printed and electronic documentation after original publication. Therefore, you should also review the documentation on http://www.cisco.com for any updates.

See the *Cisco Prime Cable Provisioning 7.0 Documentation Overview* for the list of Prime Cable Provisioning guides.

Related Documentation

See the *Cisco Prime Network Registrar 9.x Documentation Overview* for the list of Cisco Prime Network Registrar guides.

Communications, Services, and Additional Information

- To receive timely, relevant information from Cisco, sign up at Cisco Profile Manager.
- To get the business impact you're looking for with the technologies that matter, visit Cisco Services.
- To submit a service request, visit Cisco Support.

- To discover and browse secure, validated enterprise-class apps, products, solutions and services, visit Cisco Marketplace.
- To obtain general networking, training, and certification titles, visit Cisco Press.
- To find warranty information for a specific product or product family, access Cisco Warranty Finder.

Cisco Bug Search Tool

Cisco Bug Search Tool (BST) is a web-based tool that acts as a gateway to the Cisco bug tracking system that maintains a comprehensive list of defects and vulnerabilities in Cisco products and software. BST provides you with detailed defect information about your products and software.
