# Introduction

Cisco Prime Carrier Management provides end-to-end management, from access to the core, helping enable carrier-class delivery of next-generation voice, mobile, cloud, and managed services. With the modular architecture, you have the flexibility to deploy the entire integrated suite or do it incrementally as you grow your business, depending on your needs.

The Cisco Prime Carrier Management solution consists of the following applications, which are accessible through the Cisco Prime Central portal:

- Cisco Prime Network—Provides management of packet networks, including access, aggregation, edge, Multiprotocol Label Switching (MPLS) core, and Evolved Packet Core (EPC).
- Cisco Prime Optical—Provides efficient and productive optical infrastructure management for fault, configuration, performance, and security.
- Cisco Prime Performance Manager—Provides performance statistics and reports for service provider and large enterprise networks, including access, edge, distribution, core, mobile backhaul, Carrier Ethernet, MPLS core, and EPC networks.
- Cisco Prime Provisioning—Provides automated resource management and rapid, profile-based provisioning capabilities for Carrier Ethernet, Radio Access Network (RAN) backhaul, MPLS, and Packet Transport technologies.

Prime Central is compatible with the application versions listed in [Table 1](#).

## Prime Central 1.5 Bugs

For more information on a specific bug or to search for all bugs in a particular Prime Central release, use the Bug Search tool.

## Using the Bug Search Tool

Use the Bug Search tool to search for a specific bug or to search for all bugs in a release.

- 
- Step 1** Go to <http://tools.cisco.com/bugsearch>.
- Step 2** At the Log In screen, enter your registered Cisco.com username and password; then, click **Log In**. The Bug Search page opens.

**Note** If you do not have a Cisco.com username and password, you can register for them at <http://tools.cisco.com/RPF/register/register.do>.

- Step 3** To search for a specific bug, enter the bug ID in the Search For field and press **Return**.
- Step 4** To search for bugs in the current release:
- In the Search For field, enter **Prime Central 1.5** and press **Return**. (Leave the other fields empty.)

**Note** The search result may also display the bugs of other products.

- When the search results are displayed, use the filter tools to find the types of bugs you are looking for. You can search for bugs by modified date, status, severity, and so forth.

**Tip**

To export the results to a spreadsheet, click **Export Results to Excel**.
