

Preface

This guide describes how to configure Cisco Prime Network Registrar by using the web-based user interface (web UI). The guide describes how to become familiar with Cisco Prime Network Registrar features so that you can use them to administer network addresses.

Who Should Read This Guide

This guide is designed for network managers who are responsible for maintaining the network Domain Name System (DNS), Dynamic Host Configuration Protocol (DHCP), Trivial File Transfer Protocol (TFTP), and Simple Network Management Protocol (SMTP) servers. The network manager should be familiar with the following topics:

- Basic concepts and terminology used in internetworking
- Network topology and protocols

How This Guide Is Organized

The guide includes the following chapters:

[Chapter 1](#) [Introducing the Setup Web UI](#)

[Chapter 2](#) [Running the Setup Web UI](#)

Document Conventions

This guide uses the documentation conventions described in the following sections.

Formatting

This guide uses the following formatting conventions:

- User input and controls are indicated in **bold**; for example, “enter **1234**” and “click **Modify Scope**.”
- Object attributes are indicated in *italics*; for example, “the *failover-safe-period* attribute.”
- Cross-references to chapters or sections of chapters are indicated in [blue](#) type; for example, “see the [“Document Conventions” section on page vi.](#)”

Navigation and Screens

This guide uses the following navigation and screen display conventions:

- Windows systems use a two-button mouse. To drag and drop an object, click and hold the left mouse button on the object, drag the object to the target location, then release the button.
- Solaris systems use a three-button mouse. To drag and drop an object, click and hold the middle mouse button on the object, drag the object to the target location, then release the button.
- Screen displays can differ slightly from those included in this guide, depending on the system or browser you use.

Callouts

Callouts in the text have the following meaning:

Caution

Be careful. The description alerts you to potential data damage or loss.

Note

Take note. The description is particularly noteworthy.

Timesaver

Save time. The description can present a timesaver.

Tip

Consider this helpful hint. The description can present an optimum action to take.

Product Documentation

Note

We sometimes update the electronic documentation after original publication. Therefore, you should also review the documentation on Cisco.com for any updates.

Table 1 describes the product documentation that is available. You can view the marketing and user documents for Cisco Prime Network Registrar at:

http://www.cisco.com/en/US/products/ps11808/tsd_products_support_series_home.html.
