Install the Shelf and Backplane Cable

This chapter provides procedures for installing the Cisco ONS 15454. For a summary of the tools and equipment required for installation, see the “Required Tools and Equipment” section on page 1-2.

Before You Begin

This section lists the chapter procedures (NTPs). Turn to a procedure for applicable tasks (DLPs).

1. NTP-A1 Unpack and Inspect the ONS 15454 Shelf Assembly, page 1-4—Complete this procedure before continuing with the “NTP-A2 Install the Shelf Assembly” procedure on page 1-5.
2. NTP-A2 Install the Shelf Assembly, page 1-5—Complete this procedure to install the shelf assembly in a rack.
3. NTP-A3 Open and Remove the Front Door, page 1-6—Complete this procedure to access the equipment before continuing with other procedures.
4. NTP-A4 Remove the Backplane Covers, page 1-7—Complete this procedure to access the backplane before continuing with other procedures.
5. NTP-A5 Install the EIAs, page 1-8—Complete this procedure if you plan to install electrical cards. This procedure is a prerequisite to the “NTP-A9 Install the Electrical Card Cables on the Backplane” procedure on page 1-23.
6. NTP-A6 Install the Power and Ground, page 1-9—Complete this procedure before continuing with the “NTP-A7 Install the Fan-Tray Assembly” procedure on page 1-11.
7. NTP-A7 Install the Fan-Tray Assembly, page 1-11—Complete this procedure to install the fan-tray assembly in the shelf.
8. NTP-A119 Install the Alarm Expansion Panel, page 1-14—Complete this procedure if you are planning to install the Alarm Interface Controller–International (AIC-I) card and want to increase the number of alarm contacts provided by the AIC-I card.
9. NTP-A8 Attach Wires to Alarm, Timing, LAN, and Craft Pin Connections, page 1-17—Complete this procedure as needed to set up wire-wrap pin connections.
10. NTP-A120 Install an External Wire-Wrap Panel to the AEP, page 1-18—Complete this procedure to connect an external wire-wrap panel to the alarm expansion panel (AEP).
11. NTP-A9 Install the Electrical Card Cables on the Backplane, page 1-23—Complete this procedure if you plan to install electrical card cables.
12. NTP-A10 Route Electrical Cables, page 1-24—Complete this procedure as needed to route electrical cables installed on the backplane.
Chapter 1 Install the Shelf and Backplane Cable

Required Tools and Equipment

You need the following tools and equipment to install and test the ONS 15454.

Cisco-Supplied Materials

The following materials are required and are shipped with the ONS 15454 shelf (wrapped in plastic). The number in parentheses gives the quantity of the item included in the package.

- #12-24 x 3/4 pan-head Phillips mounting screws (48-1004-XX, 48-1007-XX) (8)
- #12-24 x 3/4 socket set screws (48-1003-XX) (2)
- T-handle #12-24 hex tool for set screws (1)
- ESD wrist strap with 1.8 m (6 ft) coil cable (1)
- Tie wraps (10)
- Pinned hex (Allen) key for front door (1)
- Spacers (50-1193-XX) (4)
- Spacer mounting brackets (2)
- Clear plastic rear cover (1)
- External (bottom) brackets for the fan-tray air filter
- Shelf accessory kit (53-2329-XX) (optional)
  - Two mounting bars (700-19701-XX)
  - Four 1-inch standoffs (50-1193-01)
- Four 1 3/8-inch standoffs (50-1492-01)
- Eight 2-inch standoffs (50-1453-01)
- Four flathead screws, 6-32 x 0.5 (48-2116-01)
- Standoff kit (53-0795-XX):
  - Plastic fiber management guides (2)
  - Fan filter bracket screws (53-48-0003) (6)

The following materials are required to install the optional air ramp. The number in parentheses gives the quantity of the item included in the package:
- M4.0x 8mm, SS pan-head Phillips mounting screws (2)
- Mounting brackets, 19 inch (482.6 mm), 23 inch (584.2 mm) (2)

**User-Supplied Materials**

The following materials and tools are required but are not supplied with the ONS 15454:
- One or more of the following equipment racks:
  - 19-inch ANSI Standard (Telcordia GR-63-CORE) (482.6 mm) rack; total width 22 inches (558.8 mm)
  - 23-inch ANSI Standard (Telcordia GR-63-CORE) (584.2 mm) rack; total width 26 inches (660.4 mm)
- Fuse panel
- Power cable (from fuse and alarm panel to assembly), #10 AWG, copper conductors, 194 degrees Fahrenheit (90 degrees Celsius)
- Ground cable #6 AWG stranded
- Alarm cable pairs for all alarm connections, #22 or #24 AWG (0.51 mm² or 0.64 mm²), solid tinned
- 100-ohm shielded building integrated timing supply (BITS) clock cable pair #22 or #24 AWG (0.51 mm² or 0.64 mm²), twisted-pair T1-type
- Single-mode SC fiber jumpers with UPC polish (55 dB or better) for optical (OC-N) cards
- Shielded coaxial cable terminated with SMB or BNC connectors for DS-3 cards
- Shielded ABAM cable terminated with AMP Champ connectors or unterminated for DS1N-14 cards with #22 or #24 AWG (0.51 mm² or 0.64 mm²) ground wire (typically about two ft [61 cm] in length)
- 6-pair #29 AWG double-shielded cable
- Tie wraps and/or lacing cord
- Labels
- Listed pressure terminal connectors, typically dual lug type; connectors must be suitable for #6 AWG copper conductors with stud size and spacing per equipment rack specifications; connection to office ground typically through H-TAP compression connector, according to site practice

**Tools Needed**

The following tools are needed to install an ONS 15454:
- #2 Phillips screwdriver
Chapter 1 Install the Shelf and Backplane Cable

NTP-A1 Unpack and Inspect the ONS 15454 Shelf Assembly

- Medium slot-head screwdriver
- Small slot-head screwdriver
- Wire wrapper
- Wire cutters
- Wire strippers
- Crimp tool
- BNC insertion tool

Test Equipment

The following test equipment is needed to install an ONS 15454:
- Voltmeter
- Optical power meter (for use with fiber optics only)
- Bit error rate (BER) tester, DS-1 and DS-3

NTP-A1 Unpack and Inspect the ONS 15454 Shelf Assembly

<table>

</tbody>
</table>

Note

The ONS 15454 high-density shelf (15454-SA-HD) is required if you want to use the high-density electrical cards (DS3/EC1-48 and DS1/E1-56 cards).

Step 1
Complete the “DLP-A1 Unpack and Verify the Shelf Assembly” task on page 17-1.

Step 2
Complete the “DLP-A2 Inspect the Shelf Assembly” task on page 17-2.

Step 3
Continue with the “NTP-A2 Install the Shelf Assembly” procedure on page 1-5.

Stop. You have completed this procedure.
## NTP-A2 Install the Shelf Assembly

### Purpose
This procedure reverses the mounting bracket and mounts shelf assemblies in a rack.

### Tools/Equipment
- #2 Phillips screwdriver
- Medium slot-head screwdriver
- Small slot-head screwdriver
- Pinned hex key
- Two set screws (48-1003-XX)

### Prerequisite Procedures
- NTP-A1 Unpack and Inspect the ONS 15454 Shelf Assembly, page 1-4

### Required/As Needed
- Required
- Onsite
- Security Level: None

### Warning
- To prevent the system from overheating, do not operate it in an area that exceeds the maximum recommended ambient temperature of: 
  131°F (55°C). Statement 1047

### Warning
- To prevent airflow restriction, allow at least 1 inch (25.4 mm) of clearance around the ventilation openings. Statement 1076

### Warning
- To prevent bodily injury when mounting or servicing this unit in a rack, you must take special precautions to ensure that the system remains stable. The following guidelines are provided to ensure your safety:
  - This unit should be mounted at the bottom of the rack if it is the only unit in the rack.
  - When mounting this unit in a partially filled rack, load the rack from the bottom to the top with the heaviest component at the bottom of the rack.
  - If the rack is provided with stabilizing devices, install the stabilizers before mounting or servicing the unit in the rack. Statement 1006

### Warning
- The ONS 15454 must have 1 inch (25.4 mm) of airspace below the installed shelf assembly to allow air flow to the fan intake. The air ramp (the angled piece of sheet metal on top of the shelf assembly) provides this spacing and should not be modified in any way.

### Note
- To install the air filter inside the air ramp unit (15454E-AIR-RAMP or 15454-AIR-RAMP), use the ETSI version of the air filter (15454-FTF2 or 15454E-FTF4).
Note
The 10-Gbps-compatible shelf assembly (15454-SA-HD) and fan-tray assembly (15454-FTA3) are required with the ONS 15454 XC10G, OC-192, and OC-48 any slot (AS) cards.

Note
The ONS 15454 installations are suitable for Network Telecommunication facilities and locations where NEC are applicable.

---

**Chapter 1 Install the Shelf and Backplane Cable**

**Step 1**
Complete the “DLP-A3 Reverse the Mounting Bracket to Fit a 19-inch (482.6 mm) Rack” task on page 17-2 if you need to convert from a 23-inch (584.2 mm) to a 19-inch (482.6 mm) rack.

**Step 2**
To install the air filter on the bottom of the shelf rather than below the fan-tray assembly, complete the “DLP-A4 Install the External Brackets and Air Filter” task on page 17-4.

**Step 3**
Complete the necessary rack mount task:
- DLP-A5 Mount the Shelf Assembly in a Rack (One Person), page 17-5
- DLP-A6 Mount the Shelf Assembly in a Rack (Two People), page 17-6
- DLP-A7 Mount Multiple Shelf Assemblies in a Rack, page 17-7

**Step 4**
Continue with the “NTP-A3 Open and Remove the Front Door” procedure on page 1-6.

Stop. You have completed this procedure.

---

**NTP-A3 Open and Remove the Front Door**

**Purpose**
This procedure opens and removes the front door to access the equipment.

**Tools/Equipment**
Open-end wrench
Pinned hex key

**Prerequisite Procedures**
NTP-A2 Install the Shelf Assembly, page 1-5

**Required/As Needed**
Required

**Onsite/Remote**
Onsite

**Security Level**
None

**Step 1**
Complete the “DLP-A8 Open the Front Door” task on page 17-8.

**Step 2**
As needed, complete the “DLP-A9 Remove the Front Door” task on page 17-9.

**Step 3**
Continue with the “NTP-A4 Remove the Backplane Covers” procedure on page 1-7.

Stop. You have completed this procedure.
NTP-A4 Remove the Backplane Covers

**Purpose**
This procedure describes how to access the backplane by removing the covers. The backplane has two sheet metal covers (one on either side) and a lower backplane cover at the bottom.

**Tools/Equipment**
- #2 Phillips screwdriver
- Medium slot-head screwdriver
- Small slot-head screwdriver

**Prerequisite Procedures**
- NTP-A2 Install the Shelf Assembly, page 1-5
- NTP-A3 Open and Remove the Front Door, page 1-6

**Required/As Needed**
- Required

**Onsite/Remote**
- Onsite

**Security Level**
- None

---

**Warning**
The covers are an integral part of the safety design of the product. Do not operate the unit without the covers installed.

---

**Step 1**
Complete the “DLP-A10 Remove the Lower Backplane Cover” task on page 17-10.

**Step 2**
Complete the “DLP-A11 Remove the Backplane Sheet Metal Cover” task on page 17-11.

**Step 3**
If you plan to install electrical interface assemblies (EIAs), continue with the “NTP-A5 Install the EIAs” procedure on page 1-8. If not, continue with the “NTP-A6 Install the Power and Ground” procedure on page 1-9.

Stop. You have completed this procedure.
NTP-A5 Install the EIAs

Purpose
This procedure describes how to install electrical interface assemblies (EIAs). Typically, an EIA panel is installed on the backplane during manufacturing, but EIA panels can be ordered separately. Refer to the Cisco ONS 15454 Reference Manual for descriptions of the EIAs.

Tools/Equipment
#2 Phillips screwdriver
Medium slot-head screwdriver
Small slot-head screwdriver
Perimeter screws (9)
Inner screws (12)
Backplane cover screws (5)
EIA card (SMB, BNC, AMP Champ, UBIC-V, UBIC-H, MiniBNC)

Prerequisite Procedures
NTP-A4 Remove the Backplane Covers, page 1-7

Required/As Needed
Required if the node will use electrical signals

Onsite/Remote
Onsite

Security Level
None

Caution
Always use the supplied ESD wristband when working with a powered ONS 15454. For detailed instructions on how to wear the ESD wristband, refer to the Cisco ONS Electrostatic Discharge (ESD) and Grounding Guide.

Note
EIAs are normally factory installed. Verify that the correct EIA is installed on the shelf assembly. If not, install the correct EIA.

Note
You do not need to power down the shelf before removing or installing an EIA. An in-service upgrade of one EIA (A side or B side) is possible if all electrical traffic (DS-1, DS-3, DS3XM-6, and EC-1) is being carried on the other side.

Step 1
Complete the “DLP-A12 Install a BNC or High-Density BNC EIA” task on page 17-12 as needed. BNCs are locking connectors; the high-density BNC provides access to every port on every card.

Step 2
Complete the “DLP-A373 Install a MiniBNC EIA” task on page 20-56 as needed. The MiniBNC allows up to 96 DS-3 circuits on each side of the ONS 15454.

Step 3
Complete the “DLP-A13 Install an SMB EIA” task on page 17-15 as needed. SMBs allow you to access every port on every card using more space and efficient cabling.

Step 4
Complete the “DLP-A14 Install the AMP Champ EIA” task on page 17-16 as needed. AMP Champs are exclusive to DS-1 cables.

Step 5
Complete the “DLP-A190 Install a UBIC-V EIA” task on page 18-59 as needed. The UBIC-V (vertical) EIAs allow you to use high-density electrical cards. The UBIC-V EIAs provide SCSI connectors.
Step 6  Complete the “DLP-A399 Install a UBIC-H EIA” task on page 20-108 as needed. The UBIC-H (horizontal) EIAs allow you to use high-density electrical cards. The UBIC-H EIAs provide SCSI connectors.

Note  To attach cables to the EIAs, see the “NTP-A9 Install the Electrical Card Cables on the Backplane” procedure on page 1-23.

Step 7  Continue with the “NTP-A6 Install the Power and Ground” procedure on page 1-9.

Stop. You have completed this procedure.

NTP-A6 Install the Power and Ground

Purpose  This procedure installs power feeds and grounds the ONS 15454.

Tools/Equipment
#2 Phillips screwdriver
Medium slot-head screwdriver
Small slot-head screwdriver
Screws
Power cable (from fuse and alarm panel to assembly), #10 AWG, copper conductors, 194 degrees F (90 degrees C)
Ground cable (from equipment frame to office ground), #6 AWG stranded
Listed pressure terminal connectors, typically dual lug type; connectors must be suitable for #6 AWG copper conductors with stud size and spacing per equipment rack specifications; connection to office ground typically through H-TAP compression connector, according to site practice
Wire cutters
Wire strippers
Crimp tool
Fuse panel

Prerequisite Procedures  NTP-A4 Remove the Backplane Covers, page 1-7

Required/As Needed  Required

Onsite/Remote  Onsite

Security Level  None

Warning  Before performing any of the following procedures, ensure that power is removed from the DC circuit. Statement 1003

Warning  This equipment is intended to be grounded. Ensure that the host is connected to earth ground during normal use. Statement 39
Warning  Use copper conductors only. Statement 1025

Warning  Connect the unit only to DC power source that complies with the safety extra-low voltage (SELV) requirements in IEC 60950 based safety standards. Statement 1033

Warning  This product requires short-circuit (overcurrent) protection, to be provided as part of the building installation. Install only in accordance with national and local wiring regulations. Statement 1045

Warning  A readily accessible two-poled disconnect device must be incorporated in the fixed wiring. Statement 1022

Warning  This unit might have more than one power supply connection. All connections must be removed to de-energize the unit. Statement 1028

Caution  Always use the supplied ESD wristband when working with a powered ONS 15454. For detailed instructions on how to wear the ESD wristband, refer to the Cisco ONS Electrostatic Discharge (ESD) and Grounding Guide.

Step 1  Verify one of the following:
- If you have the 15454-SA-ANSI or 15454-SA-HD shelf, a 100-A fuse panel (35-A fuse per shelf minimum) should be installed. If not, install one according to manufacturer’s instructions.
- If you have the 15454-SA-NEBS3 shelf, a standard 80-A fuse panel (20-A fuse per shelf minimum) should be installed. If not, install one according to manufacturer’s instructions.

Step 2  Connect the chassis to the office ground. For detailed instructions on grounding the chassis, refer to the Cisco ONS Electrostatic Discharge (ESD) and Grounding Guide.

Step 3  Complete the “DLP-A17 Connect Office Power to the ONS 15454 Shelf” task on page 17-18.

Step 4  Complete the “DLP-A18 Turn On and Verify Office Power” task on page 17-20.

Step 5  Continue with the “NTP-A7 Install the Fan-Tray Assembly” procedure on page 1-11.

Stop. You have completed this procedure.
NTP-A372 View Shelf Voltage and Temperature

Purpose
This procedure displays the shelf voltage and temperature of the ONS 15454 chassis in CTC.

Tools/Equipment
None

Prerequisite Procedures
DLP-A60 Log into CTC, page 17-60

Required/As Needed
As Needed

Onsite/Remote
Remote

Security Level
Provisioning or higher

Note
The temperature measured by the TCC2/TCC2P sensors appears on the LCD screen in the ONS 15454 chassis.

Note
Read all references of “TCC2/TCC2P cards” in this document as “TCC2/TCC2P/TCC3 cards”.

Step 1
In node view (single-node mode) or multishelf view (multishelf mode), click the Provisioning > General > Voltage/Temperature tabs. The Voltage/Temperature pane appears.

Step 2
The Voltage/Temperature pane retrieves the following values:
- Voltage A—Voltage of the shelf that corresponds to power supply A, in millivolts.
- Voltage B—Voltage of the shelf that corresponds to power supply B, in millivolts.
- Chassis Temperature—Temperature of the shelf in degrees Celsius.

Step 3
Click the Reset button to refresh the voltage and temperature values.

Stop. You have completed this procedure.

NTP-A7 Install the Fan-Tray Assembly

Purpose
This procedure installs the fan-tray assembly. Refer to the Cisco ONS 15454 Reference Manual for specific information about fan-tray assembly compatibility and air filters.

Tools/Equipment
#2 Phillips screwdriver
Medium slot-head screwdriver
Small slot-head screwdriver

Prerequisite Procedures
NTP-A3 Open and Remove the Front Door, page 1-6
NTP-A6 Install the Power and Ground, page 1-9

Required/As Needed
Required

Onsite/Remote
Onsite

Security Level
None
Caution

Do not operate an ONS 15454 without a fan-tray air filter. A fan-tray air filter is mandatory.

Caution

The 15454-FTA3 fan-tray assembly can only be installed in ONS 15454 Release 3.1 or later shelf assemblies (15454-SA-ANSI, 800-19857; 15454-SA-HD, 800-24848). It includes a pin that does not allow it to be installed in ONS 15454 shelf assemblies released earlier than ONS 15454 Release 3.1 (15454-SA-NEBS3E, 15454-SA-NEBS3, and 15454-SA-R1, P/N 800-0714915454). Installing the 15454-FTA3 in a noncompliant shelf assembly might result in failure of the alarm interface panel (AIP), which in turn, will result in power loss to the fan-tray assembly.

Caution

You must place the edge of the air filter flush against the front of the fan-tray assembly compartment when installing the fan tray on top of the filter. Failure to do so could result in damage to the filter, the fan tray, or both.

Caution

Do not force a fan-tray assembly into place. Doing so can damage the connectors on the fan tray and/or the connectors on the back panel of the shelf assembly.

Caution

If the fan tray does not slide all the way to the back of the shelf assembly, pull the fan tray out and readjust the position of the reusable filter until the fan tray fits correctly. Be sure that the grid on the reusable filter is on the side facing the fan tray.

Note

If you are installing the ONS 15454 in an outside plant cabinet, remove the air filter to provide maximum cooling capabilities and to comply with Telcordia GR-487-CORE.

Note

To install the fan-tray assembly, it is not necessary to move any of the cable-management facilities.

Step 1

Install the air filter. The air filter can be installed internally between the fan tray and shelf assembly, or externally by mounting the air filter bracket on the bottom of the shelf assembly. Slide the air filter into the bracket.

Caution

Although the air filter can work with older fan trays if it is installed with either side facing up, Cisco recommends that you install it with the metal bracing facing up to preserve the surface of the filter. You must install the air filter with the metal bracing facing up with 15454-CC-FTA.
Step 2  Install the fan-tray assembly. The fan-tray assembly has locks on the outer edges. Press and hold the locks as you slide the fan-tray assembly into the shelf assembly. The electrical plug at the rear of the tray should plug into the corresponding receptacle on the assembly.

Caution  Do not force a fan-tray assembly into place. This can damage the connectors on the fan-tray assembly and/or the connectors on the back panel of the shelf assembly.

Step 3  To verify that the tray has plugged into the backplane, look at the fan tray and listen to determine that the fans are running.

Figure 1-1  shows the location of the fan tray.

Figure 1-1  Installing the Fan-Tray Assembly

Step 4  Continue with the “NTP-A119 Install the Alarm Expansion Panel” procedure on page 1-14 if you plan to install an alarm expansion panel (AEP). If not, continue with the “NTP-A8 Attach Wires to Alarm, Timing, LAN, and Craft Pin Connections” procedure on page 1-17.

Stop. You have completed this procedure.
NTP-A119 Install the Alarm Expansion Panel

**Purpose**
This procedure installs an alarm expansion panel (AEP) onto the 15454-SA-ANSI or 15454-SA-HD shelf backplane. The AEP provides alarm contacts in addition to the 16 provided by the AIC-I card. Typically, the AEP is preinstalled when ordered with the ONS 15454; however, the AEP can be ordered separately. The AIC-I card must be installed before you can provision the alarm contacts enabled by the AEP.

**Tools/Equipment**
- #2 Phillips screwdriver
- Medium slot-head screwdriver
- Small slot-head screwdriver
- Wire wrapper
- Standoffs (4)

**Prerequisite Procedures**
DLP-A10 Remove the Lower Backplane Cover, page 17-10

**Required/As Needed**
As needed

**Onsite/Remote**
Onsite

**Security Level**
None

---

**Note**
The AIC-I card provides direct alarm contacts (external alarm inputs and external control outputs). In the ANSI shelf, these AIC-I alarm contacts are routed through the backplane to wire-wrap pins accessible from the back of the shelf. When you install an AEP, the direct AIC-I alarm contacts cannot be used. Only the AEP alarm contacts can be used.

---

**Step 1**
Remove the two backplane screws. Replace the two screws with standoffs. Insert the longer standoff on the left and the shorter standoff on the right (Figure 1-2).
**Step 2**  Attach the remaining two standoffs on either side of the backplane (Figure 1-3).

**Step 3**  Position the AEP board over the standoffs.
Step 4
Insert and tighten three screws to secure the AEP to the backplane.

Step 5
Connect the AEP cable to the backplane and AEP:

a. Connect the 10 colored wires to the wire-wrap pins on the backplane. Figure 1-4 shows where the cable wires are connected. Table 1-1 shows AEP and AIC-I signals that each wire carries.

b. Plug the other end of the AEP cable into AEP connector port. The brown pin is on the top.

</table>

**Step 4** Complete one of the following:

- If you plan to install electrical cards, continue with the “NTP-A9 Install the Electrical Card Cables on the Backplane” procedure on page 1-23.

- If you do not plan to install electrical cards, continue with the “NTP-A11 Install the Rear Cover” procedure on page 1-24.

Stop. You have completed this procedure.
NTP-A9 Install the Electrical Card Cables on the Backplane

Purpose
Optional EIA backplane covers are typically preinstalled when ordered with the ONS 15454. The following procedure describes how to install the electrical card cables to the backplane. If the shelf was not shipped with the correct EIA interface, you must order and install the correct EIA.

Tools/Equipment
- Wire wrapper
- Twisted-pair cables
- BNC insertion tool
- SMB cable connector
- #2 Phillips screwdriver
- Medium slot-head screwdriver
- DS-1 and DS-3 cables, as needed
- Tie-down bar, as needed

Prerequisite Procedures
NTP-A5 Install the EIAs, page 1-8

Required/As Needed
- As needed

Onsite/Remote
- Onsite

Security Level
- None

Caution
Always use the supplied ESD wristband when working with a powered ONS 15454. For detailed instructions on how to wear the ESD wristband, refer to the Cisco ONS Electrostatic Discharge (ESD) and Grounding Guide.

Note
Refer to the Cisco ONS 15454 Reference Manual for more information about EIAs.

Step 1
Complete the “DLP-A530 Install the Tie-Down Bar” task on page 22-31 as needed for routing the electrical cables you will install.

Step 2
Complete the “DLP-A23 Install DS-1 Cables Using Electrical Interface Adapters (Balun)” task on page 17-27 as needed. Baluns are used on SMB EIAs to properly terminate DS-1 signals.

Step 3
To install DS-1 cables using AMP Champ cables, complete the “DLP-A24 Install DS-1 AMP Champ Cables on the AMP Champ EIA” task on page 17-28.

Step 4
Complete the “DLP-A25 Install Coaxial Cable With BNC Connectors” task on page 17-31 as needed.

Step 5
Complete the “DLP-A26 Install Coaxial Cable With High-Density BNC Connectors” task on page 17-32 as needed.

Step 6
Complete the “DLP-A27 Install Coaxial Cable with SMB Connectors” task on page 17-32 as needed.

Step 7
Complete the “DLP-A386 Install Electrical Cables on the UBIC-V EIAs” task on page 20-84 as needed.

Step 8
Complete the “DLP-A441 Install Electrical Cables on the UBIC-H EIAs” task on page 21-23 as needed.

Step 9
Continue with the “NTP-A10 Route Electrical Cables” procedure on page 1-24.

Stop. You have completed this procedure.
NTP-A10 Route Electrical Cables

Purpose
This procedure routes and manages electrical (backplane) cables.

Tools/Equipment
RG179, RG59 (735A) #26 AWG cable, or RG59 (734A) #20 AWG cable

Prerequisite Procedures
NTP-A9 Install the Electrical Card Cables on the Backplane, page 1-23

Required/As Needed
As needed

Onsite/Remote
Onsite

Security Level
None

Step 1
Complete the “DLP-A28 Route Coaxial Cables” task on page 17-34 as needed.

Step 2
Complete the “DLP-A29 Route DS-1 Twisted-Pair Cables” task on page 17-35 as needed.

Step 3
Continue with the “NTP-A11 Install the Rear Cover” procedure on page 1-24.

Stop. You have completed this procedure.

NTP-A11 Install the Rear Cover

Purpose
This procedure explains how to install the rear cover.

Tools/Equipment
#2 Phillips screwdriver
5/16-inch nut driver
Shelf accessory kit (53-2329-XX)
• Two mounting bars (700-19701-XX)
• Four 1-inch standoffs (50-1193-01)
• Four 1 3/8-inch standoffs (50-1492-01)
• Eight 2-inch standoffs (50-1453-01)
• Four flathead screws, 6-32 x 0.5 (48-2116-01)
Plastic rear cover (700-06029-XX)

Prerequisite Procedures
NTP-A3 Open and Remove the Front Door, page 1-6

Required/As Needed
Required

Onsite/Remote
Onsite

Security Level
None

Step 1
Identify the EIA type where you will install the rear cover.

Step 2
According to Table 1-4, assemble the extended standoffs for that EIA type. Start with a 1 3/8-inch standoff and attach the other standoff(s) to that standoff to create an extended standoff. You should assemble two extended standoffs for each side, for a total of four extended standoffs per shelf.
Table 1-4  Standoffs Required for EIA Types

<table>
<thead>
<tr>
<th>EIA Type</th>
<th>Required Standoffs for One Extended Standoff</th>
<th>Total Required Standoffs per Shelf</th>
</tr>
</thead>
<tbody>
<tr>
<td>UBIC-V</td>
<td>One 1 3/8-inch</td>
<td>Four 1 3/8-inch</td>
</tr>
<tr>
<td></td>
<td>Two 2-inch</td>
<td>Eight 2-inch</td>
</tr>
<tr>
<td></td>
<td>Two 2-inch</td>

</tr>
<tr>
<td>SMB</td>
<td>One 1-inch</td>
<td>Four 1-inch</td>
</tr>
<tr>
<td>AMP Champ</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Note**  As needed, attach additional standoffs to the extended standoffs to meet site-specific cable management requirements.

**Step 3**  Locate the mounting holes where you will install the standoffs on the EIAs you are using. Figure 1-8 shows the mounting holes on the UBIC-V, Figure 1-9 shows the mounting holes on the UBIC-H, Figure 1-10 shows the mounting holes on the remaining EIA types (MiniBNC, SMB, etc.). You can identify the mounting holes on all EIAs by locating the **REAR COVER BRACKET LOCATION** designation.
Figure 1-8  Mounting Holes on the UBIC-V EIA

Figure 1-8 shows the mounting holes on the UBIC-V EIA. The holes are labeled on both the B-side and A-side of the device.
Figure 1-9  Mounting Holes on the UBIC-H

B-side mounting holes

A-side mounting holes
Step 4  Use a 5/16-inch nutdriver to install the extended standoffs in the mounting holes.

Step 5  Locate the *TOP* designation on one of the mounting bars (700-19701-XX) and align the appropriate holes for your EIA with the extended standoffs (Figure 1-11).
**Step 6**  
Tighten the two screws (48-2116-01) for each mounting bar.

**Step 7**  
Repeat Steps 5 and 6 for the second mounting bar.

**Step 8**  
Attach the rear cover (700-06029-XX) by hanging it from the mounting screws on the back of the mounting bars and pulling it down until it fits firmly into place (Figure 1-12) or by using standoffs (Figure 1-13).
Figure 1-12  Installing the Rear Cover Onto the Mounting Bars
Stop. You have completed this procedure.

NTP-A13 Perform the Shelf Installation Acceptance Test
