Revision History

Date	Notes
June 2011	Updated the section “Creating a Project” in the chapter “Creating and Analyzing Networks”.
July 2011	Updated the section “Understanding Hybrid Configuration” in the chapter “Introduction”.
March 2012	Updated the table “Optical Results Tab Columns” in the chapter “Viewing Network Reports”.
August 2012	The full length book-PDF was generated.

Document Objectives

The *Cisco Transport Planner DWDM Operations Guide, Release 9.3* explains how to design networks using the Cisco Transport Planner design tool for the Cisco ONS 15454 SONET and SDH systems. It contains information about how to design an optical network. Use the *Cisco Transport Planner DWDM Operations Guide, Release 9.3* in conjunction with the appropriate publications listed in the [Related Documentation](#) section.

Audience

This publication is intended for experienced network system engineers who are responsible for planning and ordering equipment for Cisco optical networking systems.

Document Organization

This *Cisco Transport Planner DWDM Operations Guide, Release 9.3* is organized into the following chapters:

- [Chapter 1, “Introduction”](#) provides a list of features, an overview of the network design process, a description of the internal architecture, and the Cisco Transport Planner procedural flow.
- [Chapter 2, “Creating and Analyzing Networks”](#) provides instructions for using the Cisco Transport Planner tool to create a network design.
- [Chapter 3, “Viewing Network Reports”](#) provides instructions for generating reports and bills of materials.
- [Chapter 4, “Editing a Project”](#) provides instructions for adjusting and optimizing design components.
- [Chapter 5, “Modeled Network Examples”](#) provides examples of typical optical networks that you can model using Cisco Transport Planner.
- [Appendix A, “GUI Information and Shortcuts”](#) provides Cisco Transport Planner graphical user interface shortcuts.
- [Appendix B, “Card Types”](#) provides a list of card types that can be used to build a network, and the corresponding Cisco product identifier.
- [Appendix C, “System Messages”](#) provides a list of system errors.
- [Appendix D, “Third-Party DWDM Wavelength Interface Model”](#) provides reference information on third-party DWDM interface calculation.
- [Appendix E, “Configuring CTP to Run on a Server”](#) provides instructions to run CTP on a server.
- [Appendix F, “Pay As You Grow Bundles”](#) provides information about the composition of each PAYG bundle.

Related Documentation

Use this *Cisco Transport Planner DWDM Operations Guide, Release 9.3* in conjunction with the following referenced Release 9.3 publications:

- *Cisco ONS 15454 DWDM Configuration Guide*
- *Cisco ONS 15454 DWDM Troubleshooting Guide*
- *Cisco ONS SONET TL1 Command Guide*
- *Cisco ONS SDH TL1 Command Guide*
- *Release Notes for Cisco Transport Planner*
- *Release Notes for Cisco ONS 15454, ONS 15454 M2, and ONS 15454 M6 DWDM*

Document Conventions

This publication uses the following conventions:

Convention	Application
boldface	Commands and keywords in body text.
<i>italic</i>	Command input that is supplied by the user.
[]	Keywords or arguments that appear within square brackets are optional.
{ x x x }	A choice of keywords (represented by x) appears in braces separated by vertical bars. The user must select one.
Ctrl	The control key. For example, where Ctrl + D is written, hold down the Control key while pressing the D key.
screen font	Examples of information displayed on the screen.
boldface screen font	Examples of information that the user must enter.
< >	Command parameters that must be replaced by module-specific codes.

Note

Means *reader take note*. Notes contain helpful suggestions or references to material not covered in the document.

Caution

Means *reader be careful*. In this situation, the user might do something that could result in equipment damage or loss of data.

**Warning**

IMPORTANT SAFETY INSTRUCTIONS

This warning symbol means danger. You are in a situation that could cause bodily injury. Before you work on any equipment, be aware of the hazards involved with electrical circuitry and be familiar with standard practices for preventing accidents. To see translations of the warnings that appear in this publication, refer to the translated safety warnings that accompanied this device.

Note: SAVE THESE INSTRUCTIONS

Note: This documentation is to be used in conjunction with the specific product installation guide that shipped with the product. Please refer to the Installation Guide, Configuration Guide, or other enclosed additional documentation for further details.

Obtaining Optical Networking Information

This section contains information that is specific to optical networking products. For information that pertains to all of Cisco, refer to the [Obtaining Documentation and Submitting a Service Request](#) section.

Where to Find Safety and Warning Information

For safety and warning information, refer to the *Cisco Optical Transport Products Safety and Compliance Information* document that accompanied the product. This publication describes the international agency compliance and safety information for the Cisco ONS 15454 system. It also includes translations of the safety warnings that appear in the ONS 15454 system documentation.

Cisco Optical Networking Product Documentation CD-ROM

Optical networking-related documentation, including Cisco ONS 15xxx product documentation, is available in a CD-ROM package that ships with your product. The Optical Networking Product Documentation CD-ROM is updated periodically and may be more current than printed documentation.

Obtaining Documentation and Submitting a Service Request
