

# Release Notes for Cisco ASR 1000 Series, Cisco IOS XE Everest 16.5

---

**First Published:** 2017-04-14

**Last Modified:** 2018-03-28

## About Cisco ASR 1000 Series Aggregation Services Routers

### Note

Come to the Content Hub at [content.cisco.com](https://content.cisco.com), where, using the Faceted Search feature, you can accurately zoom in on the content you want; create customized PDF books on the fly for ready reference; and can do so much more...

So, what are you waiting for? Click [content.cisco.com](https://content.cisco.com) now!

And, if you are already experiencing the Content Hub, we'd like to hear from you!

Click the **Feedback** icon on the page and let your thoughts flow!

---

Cisco ASR 1000 Series Aggregation Services Routers are Cisco routers deployed as managed service provide routers, enterprise edge routers, and service provider edge routers. These routers use an innovative and powerful hardware processor technology known as the Cisco QuantumFlow Processor.

Cisco ASR 1000 Series Aggregation Services Routers run the Cisco IOS XE software and introduce a distributed software architecture that moves many operating system responsibilities out of the IOS process. In this architecture, Cisco IOS, which was previously responsible for almost all of the internal software processes, now runs as one of many Cisco IOS XE processes while allowing other Cisco IOS XE processes to share responsibility for running the router.

### Note

Cisco IOS XE Everest 16.5.1b is the first release for Cisco ASR 1000 Series Aggregation Services Routers in the Cisco IOS XE Everest 16.5 release series.

---

# New Features and Important Notes

## New and Changed Information

**Note**

Before you dive into this release's features, we invite you to [content.cisco.com](https://content.cisco.com) to experience the features of the [Cisco Content Hub](#). Here, you can, among other things:

- Create customized books to house information that's relevant only to you.
- Collaborate on notes and share articles by experts.
- Benefit from context-based recommendations.
- Use faceted search to close in on relevant content.

And, if you are already experiencing the Content Hub, we'd like to hear from you!

Click the **Feedback** icon on the page and let your thoughts flow!

The following sections list the new hardware and software features that are supported on the Cisco ASR 1000 Series Aggregation Services Routers.

### New Hardware Features in Cisco IOS XE Everest 16.5.1b

No new hardware features were introduced for Cisco ASR 1000 Series in Cisco IOS XE Everest 16.5.1b.

### New Software Features in Cisco IOS XE Everest 16.5.1b

The following are the new software features introduced in Cisco ASR 1000 Series Aggregation Services Routers for Cisco IOS XE Everest 16.5.1b.

#### ACI TrustSec Integration

For detailed information, see the following Cisco document:

[http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/sec\\_usr\\_cts/configuration/xs-16/sec\\_usr\\_cts-xe-16-book/cts-aci-intgn.html](http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/sec_usr_cts/configuration/xs-16/sec_usr_cts-xe-16-book/cts-aci-intgn.html)

#### Application Hosting

For detailed information, see the following Cisco document:

<http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/datamodels/configuration/xs-16/data-models-xe-16-book.html>

#### Attack Surface Reduction: Display Active TCP Ports

To display all the open ports on a device, use the `show ip ports all` command in User EXEC or privileged EXEC mode. This command provides a list of all open TCP/IP ports on the system including the ports opened using Cisco networking stack.

The show ip ports all command was integrated into ASR 1000 Series Aggregation Routers for the Cisco IOS XE Everest 16.5.1 release.

For detailed information, see the following Cisco document:

[http://www.cisco.com/c/en/us/td/docs/ios/lanswitch/command/reference/lsw\\_book/lsw\\_s1.html](http://www.cisco.com/c/en/us/td/docs/ios/lanswitch/command/reference/lsw_book/lsw_s1.html)

### **Autonegotiation Support for SFP-GE-T and GLC-TE**

Effective with Cisco IOS XE Everest 16.5.1b, autonegotiation is supported on 1000BASE-T SFP module (SFP-GE-T) and 1000BASE-T SFP module (GLC-TE).

### **Cisco TrustSec: Externalizing Operational Data (IP-SGT mapping & RBACL permission)**

For detailed information, see the following Cisco document:

[http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/sec\\_usr\\_cts/configuration/xs-16/sec-usr-cts-xe-16-book/cts-ext-ops.html](http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/sec_usr_cts/configuration/xs-16/sec-usr-cts-xe-16-book/cts-ext-ops.html)

### **CUBE Support for SRTP-SRTP and SRTP-RTP Interworking with NGE Cipher Suites**

For detailed information, see the following Cisco document:

<http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/voice/cube/configuration/cube-book/srtp-srtp-interworking.html>

### **EEM Enhancements for Actions and Environment Variable Support in Python Policy**

For detailed information, see the following Cisco document:

<http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/datamodels/configuration/xs-16/data-models-xe-16-book.html>

### **ERSPAN-on-QinQ-sub-interface**

For detailed information, see the following Cisco document:

<http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/lanswitch/configuration/xs-16/lanswitch-xe-16-book/lsw-conf-erspan.html>

### **Fast Convergence Support in OSPFv2 and OSPFv3**

For detailed information, see the following Cisco document:

[http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/seg\\_routing/configuration/xs-16/seg-rt-xe-16-book/seg-rout-traffic-engg.html](http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/seg_routing/configuration/xs-16/seg-rt-xe-16-book/seg-rout-traffic-engg.html)

### **Gx Diameter Support for ISG Sessions**

For detailed information, see the following Cisco document:

<http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/isg/configuration/xs-16/isg-xe-16-book/isg-gx-dia-support.html>

### **ICMP Inspection Improvement**

With the Internet Control Message Protocol (ICMP) Inspection enhancement, after configuring the icmp unreachable allow command, the ICMP packets are passed through the zone-based firewall (ZBFW) even if the ICMP packets do not have Access Control List (ACL) to match ICMP of type 3.

For detailed information, see the following Cisco document:

[http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/sec\\_data\\_zbf/configuration/xs-16/sec-data-zbf-xe-16-book/fw-stateful-icmp.html](http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/sec_data_zbf/configuration/xs-16/sec-data-zbf-xe-16-book/fw-stateful-icmp.html)

### **In Service Model Updates**

For detailed information, see the following Cisco document:

<http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/datamodels/configuration/xs-16/data-models-xe-16-book.html>

### **ISIS Segment Routing enhancement - TI LFA FRR, SR-LDP interworking, Adj SID**

For detailed information, see the following Cisco document:

[http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/seg\\_routing/configuration/xs-16/seg-rt-xe-16-book/seg-rout-traffic-engg.html](http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/seg_routing/configuration/xs-16/seg-rt-xe-16-book/seg-rout-traffic-engg.html)

### **Management & Control: Boot Integrity Visibility**

For detailed information, see the following Cisco document:

<http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/fundamentals/configuration/xs-16/fundamentals-xe-16-book/bt-it-vis.html>

### **NAT: Port Parity, Range and Preservation**

For detailed information, see the following Cisco document:

[http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/ipaddr\\_nat/configuration/xs-16/nat-xe-16-book/iadnat-addr-consv.html](http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/ipaddr_nat/configuration/xs-16/nat-xe-16-book/iadnat-addr-consv.html)

### **One Global CLI to Disable Firewall**

You can enable or disable firewall on an interface with a single command. To disable the zone-based firewall configurations that have been applied on the interfaces, use the **platform inspect disable-all** command. To enable zone-based firewall on the interfaces, use the **no platform inspect disable-all** command.

For detailed information, see the following Cisco document:

[http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/sec\\_data\\_zbf/configuration/xs-16/sec-data-zbf-xe-16-book/sec-zone-pol-fw.html](http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/sec_data_zbf/configuration/xs-16/sec-data-zbf-xe-16-book/sec-zone-pol-fw.html)

### **Preboot Execution Environment (PXE) Client**

For detailed information, see the following Cisco document:

<http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/datamodels/configuration/xs-16/data-models-xe-16-book.html>

### **Provide the Capability to Select a VXLAN Source Port Range**

For detailed information, see the following Cisco document:

<http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/ceether/configuration/xs-16/ce-xe-16-book/vxlan-gpe-tunnel.html>

### **Scripting: Python 2.7/3.0**

For detailed information, see the following Cisco document:

<http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/datamodels/configuration/xr-16/data-models-xr-16-book.html>

### **Segment Routing TE Feature**

For detailed information, see the following Cisco document:

[http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/seg\\_routing/configuration/xr-16/segrt-xr-16-book/seg-rout-trafc-engg.html](http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/seg_routing/configuration/xr-16/segrt-xr-16-book/seg-rout-trafc-engg.html)

### **SID-Redist-Default-optimize, SR-TE, SR-TE Static over ip unnumbered---- ISIS SR**

For detailed information, see the following Cisco document:

[http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/seg\\_routing/configuration/xr-16/segrt-xr-16-book/seg-rout-trafc-engg.html](http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/seg_routing/configuration/xr-16/segrt-xr-16-book/seg-rout-trafc-engg.html)

### **Smart Licensing**

For detailed information, see the following Cisco document:

<http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/csa/configuration/xr-16/csa-xr-16-book/csa-smrt-license.html>

### **Software License Solution**

For detailed information, see the following Cisco document:

<http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/csa/configuration/xr-16/csa-xr-16-book/csa-sw-licse-sol.html>

### **SR On Demand Next Hops (ODN) XR - L3 / L3VPN**

For detailed information, see the following Cisco document:

[http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/seg\\_routing/configuration/xr-16/segrt-xr-16-book/seg-rout-trafc-engg.html](http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/seg_routing/configuration/xr-16/segrt-xr-16-book/seg-rout-trafc-engg.html)

### **SR-TE Dynamic**

For detailed information, see the following Cisco document:

[http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/seg\\_routing/configuration/xr-16/segrt-xr-16-book/seg-rout-trafc-engg.html](http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/seg_routing/configuration/xr-16/segrt-xr-16-book/seg-rout-trafc-engg.html)

### **SR-TE IP Unnumbered support in OSPFv2**

For detailed information, see the following Cisco document:

[http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/seg\\_routing/configuration/xr-16/segrt-xr-16-book/seg-rout-trafc-engg.html](http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/seg_routing/configuration/xr-16/segrt-xr-16-book/seg-rout-trafc-engg.html)

### **SR-TE On demand LSP**

For detailed information, see the following Cisco document:

[http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/seg\\_routing/configuration/xr-16/segrt-xr-16-book/seg-rout-trafc-engg.html](http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/seg_routing/configuration/xr-16/segrt-xr-16-book/seg-rout-trafc-engg.html)

### **Support Multiple Static VXLAN Ingress-Replication Peers (One to Many Peers)**

For detailed information, see the following Cisco document:

<http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/cether/configuration/xe-16/ce-xe-16-book/ce-vxlan-support.html>

### Tunnel QoS in load-Balancing Scenario

For detailed information, see the following Cisco document:

[http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/ipswitch\\_cef/configuration/xe-16/isw-cef-xe-16-book/isw-cef-load-balancing.html](http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/ipswitch_cef/configuration/xe-16/isw-cef-xe-16-book/isw-cef-load-balancing.html)

### VFR Support on Default Zone

With Virtual Fragmentation Reassembly (VFR) now enabled on the default zones with Dynamic Multipoint VPN (DMVPN) tunnel and zone-based firewall, there is no drop of traffic when traffic is routed through the DMVPN tunnel.

For detailed information, see the following Cisco document:

[http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/sec\\_data\\_zbf/configuration/xe-16/sec-data-zbf-xe-16-book/vrf-aware-fw.html](http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/sec_data_zbf/configuration/xe-16/sec-data-zbf-xe-16-book/vrf-aware-fw.html)

### WebUI Behavior

Supports an embedded GUI-based device-management tool that provides the ability to provision the router, simplifies device deployment and manageability, and enhances user experience. The following features are supported on the Web User Interface from Cisco IOS XE Everest 16.5.1b:

- Configuring Application Visibility—Enhanced to provide reports in a graphical representation format.
- Troubleshooting—Allows you to troubleshoot some of the basic features.

## Important Notes

The following sections contain important notes about Cisco ASR 1000 Series Aggregation Services Routers.

### CUBE—SRTP Calls

Cisco IOS XE Everest 16.5.1b is not recommended for Cisco Unified Border Element deployment involving SRTP calls.

### Yang Data Models

Effective with Cisco IOS XE Everest 16.5.1b, the Cisco IOS XE YANG models are available in the form of individual feature modules with new module names, namespaces and prefixes. Revision statements embedded in the YANG files indicate if there has been a model revision.

Navigate to <https://github.com/YangModels/yang> > vendor > cisco > xe > 1651, to see the new, main cisco-IOS-XE-native module and individual feature modules attached to this node.

There are also XPATH changes for the access-list in the *Cisco-IOS-XE-acl.yang* schema.

The *README.md* file in the above Github location highlights these and other changes with examples.

## Deferrals

Cisco IOS software images are subject to deferral. We recommend that you view the deferral notices at the following location to determine whether your software release is affected:

[http://www.cisco.com/en/US/products/products\\_security\\_advisories\\_listing.html](http://www.cisco.com/en/US/products/products_security_advisories_listing.html)

## Field Notices and Bulletins

- Field Notices—We recommend that you view the field notices to determine whether your software or hardware platforms are affected. You can find the field notices at the following location:

[http://www.cisco.com/en/US/support/tsd\\_products\\_field\\_notice\\_summary.html](http://www.cisco.com/en/US/support/tsd_products_field_notice_summary.html)

- Bulletins—You can find bulletins at the following location:

[http://www.cisco.com/en/US/products/sw/iosswrel/ps5012/prod\\_literature.html](http://www.cisco.com/en/US/products/sw/iosswrel/ps5012/prod_literature.html)

# Caveats

## Open and Resolved Bugs

The open and resolved bugs for a release are accessible through the [Cisco Bug Search Tool](#). This web-based tool provides you with access to the Cisco bug tracking system, which maintains information about bugs and vulnerabilities in this product and other Cisco hardware and software products. Within the [Cisco Bug Search Tool](#), each bug is given a unique identifier (ID) with a pattern of CSCxxNNNNN, where x is any letter (a-z) and N is any number (0-9). The bug IDs are frequently referenced in Cisco documentation, such as Security Advisories, Field Notices and other Cisco support documents. Technical Assistance Center (TAC) engineers or other Cisco staff can also provide you with the ID for a specific bug. The [Cisco Bug Search Tool](#) enables you to filter the bugs so that you only see those in which you are interested.

In addition to being able to search for a specific bug ID, or for all bugs in a product and release, you can filter the open and/or resolved bugs by one or more of the following criteria:

- Last modified date
- Status, such as fixed (resolved) or open
- Severity
- Support cases

You can save searches that you perform frequently. You can also bookmark the URL for a search and email the URL for those search results.

## Using the Cisco Bug Search Tool

For more information about how to use the [Cisco Bug Search Tool](#), including how to set email alerts for bugs and to save bugs and searches, see [Bug Search Tool Help & FAQ](#).

### Before You Begin

You must have a Cisco.com account to log in and access the [Cisco Bug Search Tool](#). If you do not have one, you can register for an account.

## SUMMARY STEPS

1. In your browser, navigate to the [Cisco Bug Search Tool](#).
2. If you are redirected to a Log In page, enter your registered Cisco.com username and password and then, click Log In.
3. To search for a specific bug, enter the bug ID in the Search For field and press Enter.
4. To search for bugs related to a specific software release, do the following:
5. To see more content about a specific bug, you can do the following:
6. To restrict the results of a search, choose from one or more of the following filters:

## DETAILED STEPS

- Step 1** In your browser, navigate to the [Cisco Bug Search Tool](#).
- Step 2** If you are redirected to a Log In page, enter your registered Cisco.com username and password and then, click Log In.
- Step 3** To search for a specific bug, enter the bug ID in the Search For field and press Enter.
- Step 4** To search for bugs related to a specific software release, do the following:
- a) In the Product field, choose Series/Model from the drop-down list and then enter the product name in the text field. If you begin to type the product name, the [Cisco Bug Search Tool](#) provides you with a drop-down list of the top ten matches. If you do not see this product listed, continue typing to narrow the search results.
  - b) In the Releases field, enter the release for which you want to see bugs. The [Cisco Bug Search Tool](#) displays a preview of the results of your search below your search criteria.
- Step 5** To see more content about a specific bug, you can do the following:
- Mouse over a bug in the preview to display a pop-up with more information about that bug.
  - Click on the hyperlinked bug headline to open a page with the detailed bug information.

- Step 6** To restrict the results of a search, choose from one or more of the following filters:

Filter	Description
Modified Date	A predefined date range, such as last week or last six months.
Status	A specific type of bug, such as open or fixed.
Severity	The bug severity level as defined by Cisco. For definitions of the bug severity levels, see <a href="#">Bug Search Tool Help &amp; FAQ</a> .
Rating	The rating assigned to the bug by users of the <a href="#">Cisco Bug Search Tool</a> .
Support Cases	Whether a support case has been opened or not.

Your search results update when you choose a filter.

## Caveats in Cisco IOS XE Everest Release 16.5.1b

### Open Caveats—Cisco IOS XE Everest Release 16.5.1b

All open bugs for this release are available in the [Cisco Bug Search Tool](#) through the Open Bug Search.

Caveat ID Number	Description
<a href="#">CSCvb80572</a>	ASR1000-6TGE : Byte counters reported from physical interface and child subinterface don't match
<a href="#">CSCvd23920</a>	ASR1001-X crashed when add QoS config
<a href="#">CSCvd16970</a>	Packet reordering due to "platform qos port-channel-aggregate"
<a href="#">CSCvd30843</a>	crash @ in __intel_security_check_cookie mcprp_ifdev_oper_up
<a href="#">CSCvc05143</a>	Downlink packet loss observed post RPSO across multiple streams with churn
<a href="#">CSCvd42370</a>	CUBE sRTP-RTP Call failures during bulk calls
<a href="#">CSCvb76594</a>	CT3 SPA controllers not coming UP sometimes after wr erase and reload
<a href="#">CSCvd46418</a>	crash after reload CPE with 255 EID prefix
<a href="#">CSCvc56422</a>	XE316:Prince interface flaps after soft OIR
<a href="#">CSCvc95223</a>	Looped multicast packets on dense-proxy-register border router

### Resolved Caveats—Cisco IOS XE Everest Release 16.5.1b

All resolved bugs for this release are available in the [Cisco Bug Search Tool](#) through the Resolved Bug Search.

Caveat ID Number	Description
<a href="#">CSCvc59128</a>	No kernel core when punt-keepalive crash and "no platform punt-keepalive disable-kernel-core"
<a href="#">CSCuu16717</a>	Speedracer, Kahuna and Nighster images do not support "show software authenticity"
<a href="#">CSCvc07319</a>	Random Netclock error messages appearing on console

Caveat ID Number	Description
<a href="#">CSCvc39890</a>	Applying ACL under ERSPAN session: Port matching using 'eq' doesn't occur
<a href="#">CSCvb56056</a>	MACSEC capable 1G interfaces with CU-SFP mka could not recover when reload router
<a href="#">CSCvc23622</a>	ASR1001x - Fiber SFP LED status remains amber even though line status is up and line protocol is up
<a href="#">CSCvc57589</a>	Source IP of RST from ZBFW due to invalid ACK not translated to PAT IP when inter VRF configured
<a href="#">CSCui24809</a>	"TestErrorCounterMonitor Skipped" diagnostic error on ASR1006
<a href="#">CSCvc47681</a>	Increase Number of Supported DSP Conference Profiles
<a href="#">CSCvb75726</a>	IOS-XE Always Reporting "Returned to ROM by reload"
<a href="#">CSCvd29093</a>	cpp-mcplo-ucode crash decrypting 3821 - 3839 byte ipsec packet
<a href="#">CSCvd04210</a>	IKEV2 Tunnels are flapping, rekey request received from PD, lifetime kilobytes configured
<a href="#">CSCvc06760</a>	ICMP TTL messages not returned properly with NAT
<a href="#">CSCvc71183</a>	ASR1K ESP100 - Both ESP crashing due to cpp_bqs_srt_yoda_place_child_internal: failed to grow tree
<a href="#">CSCvc86594</a>	cpp_cp process crashed cpp_bqs_srt_yoda_destroy_tree
<a href="#">CSCvc83373</a>	cpp_cp process crashes due to sw wdog expiring while creating a queue
<a href="#">CSCvc80135</a>	Crash when bandwidth remaining percent <#> is removed then re-added to a class-map
<a href="#">CSCvc74759</a>	Dual QFP Crash triggered by removing service policy from interface with mixed shaper feature enabled
<a href="#">CSCvd23034</a>	Multiple Parent Events Per Node lead to a crash
<a href="#">CSCvd47310</a>	Secondary SUP keep crashing @ CPP Client process failed
<a href="#">CSCvc79819</a>	ESP100 crashes after manual failover
<a href="#">CSCvc68778</a>	Platform switchport svi command not supported on NIM UCSE
<a href="#">CSCvc76954</a>	"bootup e-lead off" behavior like "no bootup e-lead off"

## Caveats in Cisco IOS XE Everest 16.5.2

### Open Caveats—Cisco IOS XE Everest Release 16.5.2

All open bugs for this release are available in the [Cisco Bug Search Tool](#) through the Open Bug Search.

Caveat ID Number	Description
<a href="#">CSCvf73689</a>	"delay-start" command ignore after "delay-start vrf" command
<a href="#">CSCvf15937</a>	3850 16.3.3 not replying to CoA when connecting to CWA SSID
<a href="#">CSCvd69608</a>	Asr1k crashes at PPP process on pushing 4 or more per-user static ipv6 routes
<a href="#">CSCvd97229</a>	Framed-IPv6-Route attribute is not working for IPv6 full route with leading zeros
<a href="#">CSCve00087</a>	Line-by-Line sync verifying failure on command: client test01 server-key 0 Password
<a href="#">CSCve90164</a>	Observing incorrect server state in BINOS
<a href="#">CSCve96308</a>	Observing memory leak in AAA_MALLOC_LITE
<a href="#">CSCve90160</a>	Observing memory leaks in AAA_STRDUP_GREEN_PARSER_SG_NAME1
<a href="#">CSCvf83231</a>	Cat3650 RADIUS Dynamic VLAN assignment fails for default VLAN
<a href="#">CSCvd90018</a>	PPPoA: NULL LCP Magic value in LCP echo reply
<a href="#">CSCvf41295</a>	Recommit CSCvf09355 - OBFL data not restored for ESP after router reload
<a href="#">CSCvd18432</a>	btelnet consumes 100% CPU
<a href="#">CSCve21471</a>	kernel: fsid server error fileid changed
<a href="#">CSCux20847</a>	R0/0: kernel: bullseye_i2c_master_xfer Error Repeats Every Hour
<a href="#">CSCve33266</a>	To fix diag counters processing for RP and FP slots
<a href="#">CSCvf92881</a>	cpu got hiked up 100% after scaling 350 sxp connections with 50 IP-SGT bindings in ASR.
<a href="#">CSCvd67775</a>	SGACL does not enforce policy on Virtual Access interfaces
<a href="#">CSCve53263</a>	Configured Speed/Duplex are not supported on Mgmt Eth port
<a href="#">CSCvf59830</a>	ASR1001-HX/ ASR1002-HX/ MIP-100 not able to send dot1q packet in EoMPLS.
<a href="#">CSCuz84374</a>	SPA modules on ASR1002-x show "missing" under show platform

Caveat ID Number	Description
<a href="#">CSCvb64301</a>	ASR1000-6TGE: Too many "Interface TenGigabitEthernet4/0/0, link down due to local fault" logs
<a href="#">CSCvc89102</a>	ASR1000 doesn't send PPP ECHO Reply
<a href="#">CSCvd63476</a>	Changing autoneg setting on ASR1K cause link failure on subsequent link flap (connected to 2960XR)
<a href="#">CSCvc39443</a>	router may crash with ZBFW ACL modification
<a href="#">CSCvd10362</a>	Deletion of channel-group failed on QFP when FR encaps set on associated Serial Int.
<a href="#">CSCvf65522</a>	ESP crashed - double_exception_has_occured - malformed PIM packet over GRE tunnel & ERR_DTL_INV_ADDR

## Caveats in Cisco IOS XE Everest 16.5.3

### Resolved Caveats—Cisco IOS XE Everest Release 16.5.3

All resolved bugs for this release are available in the [Cisco Bug Search Tool](#) through the Resolved Bug Search.

Caveat ID Number	Description
<a href="#">CSCvf36269</a>	Cisco IOS and IOS XE Software Plug-and-Play PKI API Certificate Validation Vulnerability
<a href="#">CSCvf60862</a>	Cisco IOS and IOS XE Software IOS daemon Cross-Site Scripting Vulnerability
<a href="#">CSCvg41950</a>	Cisco IOS XE Software Diagnostic Shell Path Traversal Vulnerability
<a href="#">CSCvh04233</a>	Crash after configuring ERSPAN on a ASR1001-HX
<a href="#">CSCvh61384</a>	16.6: vfr related drops are not observed in CSR platform
