

Enabling Support for Tunable DWDM-XFP-C

First Published: July 2013

The dense wavelength-division multiplexing (DWDM) wavelengths of the DWDM-XFP-C module on the Cisco ASR 1000 Series Aggregation Services Routers is tunable. You can configure the DWDM ITU wavelengths using the **itu channel** command in the interface configuration mode. The **itu channel** command ensures that the traffic continues to flow.

The following table contains the wavelength mapping information for the DWDM-XFP-C. module

Table 1: DWDM-XFP-C Wavelength Mapping

Channel	Frequency (THz)	Wavelength (nm)

Configuring the DWDM-XFP-C Module

Perform the following procedure to configure the DWDM-XFP-C module.

SUMMARY STEPS

1. **enable** *source-interface gigabitethernet slot/port*
2. **configure terminal**
3. **interface tengigabitethernet** *slot/port*
4. **itu channel** *number*

DETAILED STEPS

	Command or Action	Purpose
Step 1	enable <i>source-interface gigabitethernet slot/port</i> Example: Router# enable	Enables the privileged EXEC mode. If prompted, enter your password.
Step 2	configure terminal Example: Router# configure terminal	Enters the global configuration mode.
Step 3	interface tengigabitethernet <i>slot/port</i>	Specifies the 10-Gigabit Ethernet interface to be configured.

	Command or Action	Purpose
	<p>Example:</p> <pre>Router(config)# interface tengigabitethernet 4/11</pre>	<p>Here:</p> <p>slot/port—Specifies the location of the interface.</p>
Step 4	<p>itu channel <i>number</i></p> <p>Example:</p> <pre>Router(config-if)# itu channel 28</pre>	<p>Sets the ITU channel.</p> <p><i>number</i>—Specifies the ITU channel number. The acceptable values are from 1–82.</p>

Verifying the ITU Configuration

The following example shows how to use the **show hw-module subslot** command to check an ITU configuration:

```
Router# enable
Router# conf t
Enter configuration commands, one per line. End with CNTL/Z.
Router(config)#int tenGigabitEthernet 1/2/0
Router(config-if)#itu channel 20
Router(config-if)#
Router#
Router# show hw-module subslot 1/2 transceiver 0 idpr dump
