Preface

The *Cisco ASR 9000 Series Aggregation Services Router Interface and Hardware Component Configuration Guide* provides information and procedures related to router interface and hardware configuration.

From Release 6.1.2 onwards, Cisco introduces support for the 64-bit Linux-based IOS XR operating system. Extensive feature parity is maintained between the 32-bit and 64-bit environments. Unless explicitly marked otherwise, the contents of this document are applicable for both the environments. For more details on Cisco IOS XR 64 bit, refer to the Release Notes for Cisco ASR 9000 Series Routers, Release 6.1.2 document.

The preface contains the following sections:

- Changes to This Document, on page i
- Obtaining Documentation and Submitting a Service Request, on page i

Changes to This Document

This table lists the technical changes made to this document since it was first released.

Table 1: Changes to This Document

Date	Summary
