

Preface

Note This product has reached end-of-life status. For more information, see the [End-of-Life and End-of-Sale Notices](#).

This guide describes the configuration and examples for system security. For system security command descriptions, usage guidelines, task IDs, and examples, refer to the *System Security Command Reference for Cisco ASR 9000 Series Routers*.

From Release 6.1.2 onwards, Cisco introduces support for the 64-bit Linux-based IOS XR operating system. Extensive feature parity is maintained between the 32-bit and 64-bit environments. Unless explicitly marked otherwise, the contents of this document are applicable for both the environments. For more details on Cisco IOS XR 64 bit, refer to the [Release Notes](#) for Cisco ASR 9000 Series Routers, Release 6.1.2 document.

The preface contains the following sections:

- [Changes to This Document, on page i](#)
- [Communications, Services, and Additional Information, on page i](#)

Changes to This Document

This table lists the technical changes made to this document since it was first released.

Table 1: Changes to This Document

| Date | Summary |
|--------------|--|
| August 2020 | Republished with feature updates for Release 7.1.2. |
| April 2020 | Republished with feature updates for Release 7.1.15. |
| January 2020 | Initial release of this document. |

Communications, Services, and Additional Information
