

## Feature History

---

The following table lists the new and modified features supported in the Access Control List Configuration Guide in Cisco IOS XE 17 releases.

Feature	Description
<b>Cisco IOS XE Cupertino 17.7.1</b>	
<a href="#">Apply Access Control List on Management Interface</a>	This feature enables Access Control Lists (ACLs) to be applied on management interface, Gigabit 0. The ACL configuration on the management interface helps to block ICMP traffic and thus prevents the Denial-of-Service (DoS) attacks.
