

# Unpacking the Router

This section includes instructions about how to unpack the Cisco 1240 Connected Grid Router and describes the items that ship with the router.

These topics are discussed:

- [Unpacking the Router, page 5](#)
- [Router Package Contents, page 5](#)

## Unpacking the Router

**Tip:** When you unpack the router, do not remove the foam blocks attached to antennas and antenna connectors. The foam protects the antennas and connectors during installation.

To unpack the router:

1. Open the shipping container and carefully remove the contents.
2. Return all packing material to the shipping container, and save it.
3. Ensure that all items listed in the [Router Package Contents, page 5](#) are included in the shipment. If any item is damaged or missing, notify your authorized Cisco sales representative.

## Router Package Contents

Your router kit contains the items listed in [Table 1 on page 6](#).

**Note:** Some items are optional and might not be included with the router if they were not ordered with the router.

**Table 1 Cisco 1240 Connected Grid Router Package Contents**

Qty.	Item	Description
