## Information About IPv6 Multicast Explicit Tracking of Receivers

### Explicit Tracking of Receivers

The explicit tracking feature allows a device to track the behavior of the hosts within its IPv6 network. This feature also enables the fast leave mechanism to be used with MLD version 2 host reports.

## How to Configure IPv6 Multicast Explicit Tracking of Receivers

### Configuring Explicit Tracking of Receivers to Track Host Behavior

#### SUMMARY STEPS

1. **enable**
2. **configure terminal**
3. **interface** *type number*
4. **ipv6 mld explicit-tracking** *access-list-name*

#### DETAILED STEPS

	Command or Action	Purpose
Step 1	<b>enable</b>  <b>Example:</b>	Enables privileged EXEC mode. <ul style="list-style-type: none"><li>• Enter your password if prompted.</li></ul>

	Command or Action	Purpose
	Device> enable	
<b>Step 2</b>	<b>configure terminal</b> <b>Example:</b> Device# configure terminal	Enters global configuration mode.
<b>Step 3</b>	<b>interface type number</b> <b>Example:</b> Device(config)# interface FastEthernet 1/0	Specifies an interface type and number, and places the device in interface configuration mode.
<b>Step 4</b>	<b>ipv6 mld explicit-tracking access-list-name</b> <b>Example:</b> Device(config-if)# ipv6 mld explicit-tracking list1	Enables explicit tracking of hosts.

## Configuration Examples for IPv6 Multicast Explicit Tracking of Receivers

### Example: Configuring Explicit Tracking of Receivers

```
Device> enable
Device# configure terminal
Device(config)# interface FastEthernet 1/0
Device(config-if)# ipv6 mld explicit-tracking list1
```

## Feature Information for IPv6 Multicast: Explicit Tracking of Receivers

The following table provides release information about the feature or features described in this module. This table lists only the software release that introduced support for a given feature in a given software release train. Unless noted otherwise, subsequent releases of that software release train also support that feature.

Use Cisco Feature Navigator to find information about platform support and Cisco software image support. To access Cisco Feature Navigator, go to [www.cisco.com/go/cfn](http://www.cisco.com/go/cfn). An account on Cisco.com is not required.
