### Changes in behavior

- **Deprecation and phasing out features with insecure capabilities and its secure alternatives**  
From Release 25.4.1, Cisco IOS XR software displays warning messages when you configure features or protocols that lack sufficient security, such as those that transmit sensitive data without encryption or use outdated encryption mechanisms. The software also shows warnings when you do not follow security best practices, and it provides suggestions for secure alternatives.

This list may change, but Cisco plans to generate warnings for the following features and protocols from Release 25.4.1. Each Release Notes will describe the exact changes for that version. These documents list all features planned for removal, including insecure commands, and provide recommended secure alternatives to help you maintain network security and compliance.

- [Feature deprecation phasing out insecure capabilities](#)
- [Feature deprecation and removal details](#)
- [Feature removal and suggested alternatives](#)
