

## System Product IDs

This appendix provides information about the product IDs for the Cisco NCS 4009 chassis and its components.

These tables list the components that make up the routing system, their product IDs (part numbers used to order the components), and descriptions.

**Note** In the following tables, an equals sign (=) at the end of the product ID indicates that the component can be ordered as a spare. For those components, be sure to include the equals sign as part of the product ID.
