- [oper-priv](#), on page 5
- [show running-config tacacs-server host](#), on page 6

tacacs-server host

# tacacs-server host

To configure the TACACS+ server, use the **tacacs-server host** command in global configuration mode. To remove the configuration, use the **no** form of this command.

```
tacacs-server host {ip-address domain-name}
notacacs-server host {ip-address domain-name}
```

<b>Syntax Description</b>	<i>ip-address</i> Specifies the IPv4 or IPv6 address. <i>domain-name</i> Specifies the DNS domain.				
<b>Command Default</b>	None				
<b>Command Modes</b>	Global configuration (config)				
<b>Command History</b>	<table border="1"> <thead> <tr> <th>Release</th><th>Modification</th></tr> </thead> <tbody> <tr> <td>3.5.1</td><td>This command was introduced.</td></tr> </tbody> </table>	Release	Modification	3.5.1	This command was introduced.
Release	Modification				
3.5.1	This command was introduced.				

**Usage Guidelines** You must configure a TACACS+ server before the configured TACACS+ features on your network access server are available.

## Example

The following example shows how to configure the TACACS+ server:

```
nfvis(config)# tacacs-server host 192.0.2.10
nfvis(config-host-192.0.2.10)# key 0
nfvis(config-host-192.0.2.10)# admin-priv 14
nfvis(config-host-192.0.2.10)# oper-priv
nfvis(config-host-192.0.2.10)# commit
```

# key

To identify the share key encryption level for all communication between the TACACS+ server and Cisco ENCS, use the key command in host configuration mode.

**key** *key-id*

<b>Syntax Description</b>	<i>key-id</i> Specifies the identification number of an authentication key. It is either zero or one. It only supports a clear text value.				
<b>Command Default</b>	None				
<b>Command Modes</b>	Host configuration (config-host)#				
<b>Command History</b>	<table><thead><tr><th>Release</th><th>Modification</th></tr></thead><tbody><tr><td>3.5.1</td><td>This command was introduced.</td></tr></tbody></table>	Release	Modification	3.5.1	This command was introduced.
Release	Modification				
3.5.1	This command was introduced.				

## Example

The following example shows how to configure the autentication key for all communications between the TACACS+ server and Cisco ENCS:

```
nfvis(config)# tacacs-server host 209.165.201.20 shared-secret test1
nfvis(config-host-209-165-201-20)# key 0
nfvis(config-host-209-165-201-20)# commit
```

**admin-priv**

# admin-priv

To assign the admin privilege level to the administrator role, use the **admin-priv** command in host configuration mode. To remove the privilege level configuration, use the **no** form of the command.

**admin-priv** *number*  
**no** **admin-priv**

<b>Syntax Description</b>	<i>number</i> Specifies the privilege level for the admin. Valid range: 1-15.				
<b>Command Default</b>	None				
<b>Command Modes</b>	Host configuration (config-host)#				
<b>Command History</b>	<table border="1"> <thead> <tr> <th>Release</th><th>Modification</th></tr> </thead> <tbody> <tr> <td>3.5.1</td><td>This command was introduced.</td></tr> </tbody> </table>	Release	Modification	3.5.1	This command was introduced.
Release	Modification				
3.5.1	This command was introduced.				

## Example

The following example shows how to configure the privilege level for the administrator role:

```
nfvis(config)# tacacs-server host 209.165.201.20 shared-secret test1
nfvis(config-host-209-165-201-20)# admin-priv 14
nfvis(config-host-209-165-201-20)# commit
```

# oper-priv

To assign the operator privilege level to the opeartor role, use the **oper-priv** command in host configuration mode. To remove the privilege level configuration, use the **no** form of the command.

**oper-priv** *number*  
**no oper-priv**

<b>Syntax Description</b>	<i>number</i> Specifies the privilege level for the operator role. Valid range: 1-15.
<b>Command Default</b>	None
<b>Command Modes</b>	Host configuration (config-host)#
<b>Command History</b>	<b>Release Modification</b> 3.5.1 This command was introduced.

## Example

The following example shows how to configure the privilege level for the operator role:

```
nfvis(config)# tacacs-server host 209.165.201.20 shared-secret test1
nfvis(config-host-209-165-201-20)# oper-priv 9
nfvis(config-host-209-165-201-20)# commit
```

```
show running-config tacacs-server host
```

## show running-config tacacs-server host

To display the running TACACS server configuration, use the **show running-config tacacs-server** command in privileged EXEC mode.

```
show running-config tacacs-server host
```

<b>Syntax Description</b>	This command has no arguments or keywords.				
<b>Command Default</b>	None				
<b>Command Modes</b>	Privileged EXEC (#)				
<b>Command History</b>	<table><thead><tr><th>Release</th><th>Modification</th></tr></thead><tbody><tr><td>3.5.1</td><td>This command was introduced.</td></tr></tbody></table>	Release	Modification	3.5.1	This command was introduced.
Release	Modification				
3.5.1	This command was introduced.				

### Example

```
nfvis# show running-config tacacs-server host
```
