

# Quick Start: Multi-Region Fabric and Related Features

---

- [Configure Multi-Region Fabric and Related Features, on page 1](#)

## Configure Multi-Region Fabric and Related Features

*Table 1: Configure Multi-Region Fabric and Related Features*

Configuration Task	Information
Enable full Multi-Region Fabric functionality.	<a href="#">Enable Multi-Region Fabric</a>
Manage the network hierarchy, including creating regions, subregions, and secondary regions.	<a href="#">Manage a Network Hierarchy</a> in the <i>Cisco Catalyst SD-WAN Systems and Interfaces Configuration Guide</i>
Configure the Multi-Region Fabric role for a router.	<a href="#">Configure the Multi-Region Fabric Role Using a Configuration Group</a>
Configure a secondary region for a router.	<a href="#">Configure a Secondary Region Using a Configuration Group</a>
Configure how a border router interface handles access and core region traffic.	<a href="#">Configure Which Traffic a Border Router Interface Handles, Using a Configuration Group</a>
Configure how an edge router interface handles secondary region traffic.	<a href="#">Configure Which Traffic an Edge Router Interface Handles, Using a Configuration Group</a>
Configure a router to treat hierarchical and direct paths equally.	<a href="#">Configure a Router to Treat Hierarchical and Direct Paths Equally, Using a Configuration Group</a>
Configure transport gateway path behavior.	<a href="#">Configure Transport Gateway Path Behavior Using a Configuration Group</a>

Configuration Task	Information
Configure the regions for route aggregation.	<a href="#">Configure the Regions for Route Aggregation Using a Configuration Group</a>
Configure the region and subregion when deploying a configuration group to routers.	<a href="#">Configure the Region and Subregion When Deploying a Configuration Group</a>
