Merge Your Security Cloud Control and Cisco XDR Tenant Accounts

If your Secure Firewall Threat Defense or On-Premises Firewall Management Center is used with Security Cloud Control or Cisco Security Analytics and Logging (SaaS) and Cisco XDR, you must link your Security Cloud Control tenant account with the Cisco XDR tenant account associated with the device.

Be mindful of when you initiate this process. This merging process may take an extended amount of time.

See [Merge Accounts](#) for instructions.

Note If you have accounts on more than one regional cloud, you must merge accounts separately for each regional cloud.
