About Multicloud Defense

Multicloud Defense is a comprehensive security solution consisting of two primary components: the Multicloud Defense Controller and Multicloud Defense Gateway. These components collaborate to establish a secure multicloud environment.

Multicloud Defense currently supports Amazon Web Services (AWS), Azure, Google Cloud Platform (GCP), and Oracle OCI cloud accounts. The range of support for these platforms varies.

In essence, Multicloud Defense offers a sophisticated and streamlined security framework, harmonizing controller orchestration, gateway communication, and optimized datapath processing for a robust and efficient multicloud protection mechanism.

Recommended Versions

We strongly recommend using the following releases for each Multicloud Defense component:

Multicloud Defense Gateway

Version 24.06-15, July 17, 2025

Multicloud Defense Terraform Provider

Version 0.3.3, June 20, 2025
