Conduit

A conduit is the representation of the communications exchanged between two [groups](#). It is an aggregation of [activities](#) to facilitate visibility when devices and components are inside groups. The representation of conduits in Cisco Cyber Vision fit the 62443 standard which specifies policies and requirements for system security.

On the map, a conduit displays as a thick, hyphenated line that links one group to another. If the source and destination groups are known, an arrow appears

Conduits view mode is enabled by default. Disable it by using the **Show network activities** checkbox at the lower left side of the map.
