- [Collect IOx sensor logs from the Local Manager, on page 2](#)

Collect IOx sensor logs

In case of sensor issues Cisco Cyber Vision support can ask you to retrieve IOx sensor logs.

If the sensor is communicating with the Center, use the Cisco Cyber Vision GUI to generate the sensor diagnostic from the sensor statistics page.

The screenshot shows the Cisco Cyber Vision GUI interface. At the top, there's a navigation bar with the Cisco logo, a 'Home' button, and a user profile icon. The main content area is titled 'System Statistics' with a dropdown menu set to 'Last 2 hours'. Below this, there's a 'Center' section with a 'Sensors' sub-section. A search bar is present, and a list of sensors is shown, with 'FCH2309Y02K' selected. To the right of the selected sensor, its status is 'Connected', and there's a 'Generate diagnostic' button. Below the sensor details, there's a 'System Health' section with a heart icon.

If the sensor is not communicating with the Center, you can collect the logs from the sensor command line. To do so:

Procedure

- Step 1** Connect to the sensor in ssh.
- Step 2** Use the following command to get the sensor application id:

```
show app-hosting list
```

```
IE3400esc00#
IE3400esc00#
IE3400esc00#
IE3400esc00#show app-hosting list
App id                               State
-----
CVSensor                             RUNNING
IE3400esc00#
IE3400esc00#
IE3400esc00#
```

Step 3 Use the following command to connect to the sensor application:

```
app-hosting connect appid <sensor-app-id> session
```

```
IE3400esc00#
IE3400esc00#
IE3400esc00#app-hosting connect appid CVSensor session
sh-5.0#
sh-5.0#
sh-5.0#
```

Step 4 Use the following command and copy the results returned in a file to be sent to Cisco Cyber Vision support.

```
flowctl diagnostic
```

```
sh-5.0#
sh-5.0# flowctl diagnostic > iox_data/appdata/sensor-diag.log
sh-5.0#
sh-5.0#
sh-5.0#
```

Collect IOx sensor logs from the Local Manager

In case of sensor issues Cisco Cyber Vision support can ask you to retrieve IOx sensor logs. You can retrieve them through the IOx Local Manager.

Procedure

- Step 1** Access the sensor's IOx Local Manager.
- Step 2** Click the **System Troubleshoot** tab.
- Step 3** Click the **Generate snapshot file** button.

Configuration > Services > IOx

Cisco Systems
Cisco IOx Local Manager
