

User Settings

Settings for individual user profiles are accessible from **User** (profile icon) > **User Settings**.

Details

The Details section includes your user name, role, and organization.

Preferences

The Preferences section includes your XDR Ribbon authorization and theme appearance settings.

XDR Ribbon

Secure Email Threat Defense is integrated with Cisco XDR ribbon. The ribbon allows you to navigate between Cisco security products, access casebook, search observables, and view incidents. XDR ribbon is authorized per user. For more information, see [Cisco XDR, page 55](#).

Themes

You can choose to view Secure Email Threat Defense with a light or dark background. To switch the mode, go to **User** (profile icon) > **User Settings** > **Preferences** > **Theme**. Images in this guide are usually shown in the light theme. The dark background is shown below.
