

# Terminology and Documentation for Version 6.2.0.x

- [Product Terminology and Branding in Version 6.2.0.x, on page 1](#)
- [Documentation for Version 6.2.0.x, on page 2](#)
- [Known Documentation Issues in Version 6.2.0.x, on page 2](#)

## Product Terminology and Branding in Version 6.2.0.x

The terminology and branding used in Version 6.2.0.x may differ from the terminology used in previous releases as summarized in the following table. See the [Firepower System Compatibility Guide](#) for more information about terminology and branding changes.

### Product Terminology and Branding

Name	Description
Firepower System Firepower	Refers to the product line.
Firepower Management Center Management Center	Refers to Firepower management software running on physical or virtual Firepower platforms.
Cisco ASA with FirePOWER Services ASA device running an ASA FirePOWER module ASA FirePOWER module	Refers to Firepower software running on a Cisco Adaptive Security Appliance (ASA) operating system installed on an ASA platform.
ASA FirePOWER module managed with ASDM	Refers to ASA FirePOWER module local configuration interface accessible with ASDM.
Firepower Threat Defense	Refers to Firepower Threat Defense software running on a Firepower operating system installed on an ASA, Firepower 9300 appliance, Firepower 4100 series, or virtual platform.

Name	Description
Firepower Device Manager	Refers to Firepower Threat Defense local configuration interface accessible with specific Firepower Threat Defense platforms.

## Documentation for Version 6.2.0.x

The following documents were updated for Version 6.2.0.x to reflect the addition of new features and functionality and to address reported documentation issues:

- [Cisco Firepower Management Center Virtual for the AWS Cloud Quick Start Guide](#)

For additional information about updating and configuring your system, see the documents in the [Cisco Firepower System Documentation Roadmap](#).

For parallel ASA versions, see the [ASA documentation roadmap](#) and release notes (including known issues).

For the FXOS documentation roadmap and release notes (including known issues) for parallel FXOS versions, see the [Cisco FXOS Documentation](#) roadmap.

## Known Documentation Issues in Version 6.2.0.x

- The [Cisco ASA with FirePOWER Services Local Management Configuration Guide](#) refers to creating new, custom access control and system policies. ASA with FirePOWER Services does not support multiple custom policies. Instead, edit and deploy the system-provided policies.
- The [Firepower Management Center Configuration Guide](#) does not state that if you deploy an access control rule, SSL rule, or identity rule with geolocation network conditions and the system detects an IP address that appears to be moving from country to country, the system incorrectly reports the continent rule as **unknown** country.
- The [Cisco ASA with FirePOWER Services Local Management Configuration Guide](#) states *After you establish remote management and register the Cisco ASA with FirePOWER Services to a Firepower Management Center, you must manage the ASA FirePOWER module from the Firepower Management Center instead of ASDM.* However the guide does not state that once remote management is established, you cannot access the ASA FirePOWER configuration with the ASDM manager.
