

Welcome to Version 6.2.3

Thank you for choosing Firepower.

About the Release Notes

The release notes provide critical and release-specific information for Version 6.2.3, including upgrade warnings and behavior changes. Read this document even if you are familiar with Firepower releases and have previous experience upgrading Firepower deployments.

The release notes do not contain upgrade or installation instructions. Upgrading or freshly installing (reimaging) a Firepower deployment can be a complex process. Rather than provide instructions here, the release notes point you to the appropriate resources.

For links to upgrade and installation instructions, see:

- [Installation Instructions](#)

Release Dates

Sometimes Cisco releases updated builds. Only the latest build for each platform is available on the Cisco Support & Download site. You should always use the latest build. If you downloaded an earlier build, do not use it. For more information, see [Resolved Issues in New Packages](#).
