  - The Licensing chapter in the Configuration Guide for your Firepower version.
- Open source license information:
  - Open source license information for all Cisco products, including Firepower releases, is available at <https://www.cisco.com/go/opensource>.
  - Each product has its own open source licensing document, available from the Licensing Information link on the top-level documentation listing page for the product. See [Top-Level Documentation Listing Pages for FMC Deployments, on page 1](#).

### Top-Level Documentation Listing Pages for FMC Deployments

The following documents may be helpful when configuring Firepower Management Center deployments, Version 6.0+.

**Note** Some of the linked documents are not applicable to Firepower Management Center deployments. For example, some links on Firepower Threat Defense pages are specific to deployments managed by Firepower Device Manager, and some links on hardware pages are unrelated to Firepower. To avoid confusion, pay careful attention to document titles. Also, some documents cover multiple products and therefore may appear on multiple product pages.

## Migration Guides

### Firepower Migration Tool

You can use the Firepower Migration Tool to migrate supported configurations to supported Firepower Threat Defense configurations for Firepower releases 6.2.3 and later.

- [Migrating ASA to Firepower Threat Defense with the Firepower Migration Tool](#)
- [Migrating Check Point to Firepower Threat Defense with the Firepower Migration Tool](#)

### ASA-to-Firepower Threat Defense Migration Tool Image

The *Cisco ASA to Firepower Threat Defense Migration Guide* describes how to use Cisco's migration tool to convert ASA configurations to Firepower Threat Defense configurations.

**Note** This migration tool is deprecated and cannot migrate your ASA images to the latest Firepower Threat Defense releases.

## Configuration Examples and Tech Notes

Configuration examples are "how to" guides that provide an end-to-end example of the procedures required to complete a specific configuration. If the example requires configuration in more than one management application, such as Firepower Chassis Manager and Firepower Management Center the configuration example includes the procedures for both management applications.

## User Agent Documentation

### Caution

The user agent is reaching its end of support period. Firepower Management Center version 6.6 is the last version with which you can enable the user agent. The user agent cannot be enabled in Firepower Management Center 6.7 and upgrades to 6.7 will warn you to disable the user agent before upgrading.

## Additional Resources

The [Firewalls Community](#) is an exhaustive repository of reference material that complements our extensive documentation. This includes links to 3D models of our hardware, hardware configuration selector, product collateral, configuration examples, troubleshooting tech notes, training videos, lab and Cisco Live sessions, social media channels, Cisco Blogs and all the documentation published by the Technical Publications team.

Some of the individuals posting to community sites or video sharing sites, including the moderators, work for Cisco Systems. Opinions expressed on those sites and in any corresponding comments are the personal opinions of the original authors, not of Cisco. The content is provided for informational purposes only and is not meant to be an endorsement or representation by Cisco or any other party.

### Note

Some of the videos, technical notes, and reference material in the [Firewalls Community](#) points to older versions of the Firepower Management Center. Your version of the Firepower Management Center and the version referenced in the videos or technical notes might have differences in the user interface that cause the procedures not to be identical.
