

## What's New

---

These are the new features and improvements in the Security Analytics and Logging (OnPrem) release v3.1.0.

- [New Features and Functionality](#), on page 1
- [Contacting Support](#), on page 2

## New Features and Functionality

### Branding Update

We've rebranded the deployment options from Single-node and Multi-node to Manager only and Data Store. This update is to avoid confusion due to similar terms in Secure Network Analytics.

### Multiple Flow Collector Support for Data Store Deployment

Secure Firewall Management Center v7.2 supports sending Firewall events to up to 5 Flow Collectors, that are configured for Data Store, using the Security Analytics and Logging (OnPrem) wizard. For more information on how to configure multiple Flow Collectors, refer to the *Configure the Secure Firewall Management Center to Send Event Data to a Data Store Deployment* section of the [Security Analytics and Logging \(On Premises\) v3.1: Firewall Event Integration Guide](#).

### Secure Network Analytics Multi-Telemetry Support

Previously, Security Analytics and Logging (OnPrem) required a separate deployment of Secure Network Analytics due to telemetry ingest restrictions. In Secure Network Analytics v7.4.1, the Data Store deployment supports ingest of the following telemetry types simultaneously:

- Firewall events
- NetFlow
- Network Visibility Module (NVM)

For more information, refer to the [Secure Network Analytics Release Notes v7.4.1](#).

### Secure Network Analytics Single-node Data Store

The Data Store deployment now supports 1 Data Node versus the minimum of 3 required in previous releases. For more information, refer to the [Secure Network Analytics Release Notes v7.4.1](#).

### EMBLEM Logging Format Support

EMBLEM logging format is now supported in Secure Network Analytics v7.4.0 and v7.4.1. To configure, refer to the *ASDM Configuration to Send Syslog Events from ASA Devices* or the *CSM Configuration to Send Syslog Events from ASA Devices* sections of the [Firewall Event Integration Guide](#).

---

**Note** For v7.4.0, you will need to download and install the Flow Collector NetFlow Patch Rollup007 or later. For more information, refer to the [Patch Readme](#).

---

## Contacting Support

If you need technical support, please do one of the following:

- Contact your local Cisco Partner
- Contact Cisco Support
  - To open a case by web: <http://www.cisco.com/c/en/us/support/index.html>
  - To open a case by email: [tac@cisco.com](mailto:tac@cisco.com)
  - For phone support: 1-800-553-2447 (U.S.)
  - For worldwide support numbers: [https://www.cisco.com/en/US/partner/support/tsd\\_cisco\\_worldwide\\_contacts.html](https://www.cisco.com/en/US/partner/support/tsd_cisco_worldwide_contacts.html)
