Product Documentation viii

Obtaining Documentation and Submitting a Service Request 1-viii

1-viii

CHAPTER 1 **Getting Started With AUS** 1-1

Overview of Auto Update Server 1-1

Deploying AUS Behind a NAT Boundary 1-2

Adding Devices to AUS 1-3

Backing Up and Recovering the AUS Database 1-3

Understanding User Roles and Permissions 1-3

Configuring Security Manager Servers in AUS 1-4

Adding Security Manager Server 1-4

Editing Security Manager Server 1-4

Deleting Security Manager Server 1-5

Logging In to and Exiting Auto Update Server 1-5

Setting Up Browser-Server Security 1-6

Understanding the User Interface 1-7

Updating Configuration Files 1-8

Updating PIX Security Appliance, ASA, ASDM, and PDM Images 1-10

CHAPTER 2 **Managing Devices and Update Schedules** 2-1

Viewing the Device Summary Page 2-1

Adding a Device Directly to AUS 2-3

Configuring Update Schedules 2-4

Changing the Polling Interval for the Device to Contact AUS 2-5

Canceling an Update Schedule 2-5

Deleting Devices 2-6

Requesting an Immediate Auto Update 2-6

Disabling or Blocking Auto Updates 2-7

Launching Device Managers 2-7

CHAPTER 3 **Managing Files** 3-1

Viewing the File Summary Page 3-1
Adding Software Images 3-2
Deleting Software Files 3-3
Viewing Configuration Files 3-3

CHAPTER 4 **Managing File Assignments** 4-1

Viewing the Device Assignment Summary 4-2
Assigning and Unassigning Files to a Single Device 4-3
Viewing the File Assignment Summary 4-3
Assigning and Unassigning a File to Multiple Devices 4-4

CHAPTER 5 **Viewing Reports** 5-1

Viewing the System Information Report 5-1
Understanding AUS Event Types 5-2
Viewing the Event Report 5-4
Viewing the Event Failure Summary Report 5-4
Viewing the Event Success Summary Report 5-5
Viewing the No Contact Since Report 5-6

APPENDIX A **Troubleshooting AUS** A-1

Why Is the Device Not Showing Up in the Device Summary? A-1
Why Has the Device Not Contacted AUS? A-2
AUS Gives Authentication Errors—What Should I Do? A-2
Why Is the Device Not Current After I Request an Auto Update? A-3
Why Does AUS Give Errors When I Try to Add an Image File? A-4
Why Cannot I Add a Configuration File? A-4
I Assigned an Image File To a Device—Why Is It Not Current? A-4
Why Cannot I Assign Two Image Files of the Same Type To A Device? A-5
Why Does the Device Reboot After I Assign A New PIX or ASA Software Image To It? A-5
Why Does the Device Keep Downloading the Same File? A-5
Why Are Some Buttons Grayed-Out? A-5
Why Cannot I Start AUS After I Reboot My Machine? A-5
How Can I Stop A Device From Trying To Download A Faulty or Incorrect Configuration File? A-5
How Can I Check the Connection between AUS and a PIX or ASA device? A-6
What Can I Do If Configuration Errors Are Reported? A-6

Understanding Error Messages A-6

APPENDIX B **User Roles and Permissions** B-1

AUS Privileges B-1

CiscoWorks Server Roles and AUS Privileges B-2

Cisco Secure ACS Roles and AUS Privileges B-3

APPENDIX C **Bootstrapping Devices to Operate with AUS** C-1

Bootstrapping Security Appliances C-1

Configuring the Software Image and ASDM Image to Boot C-2

INDEX
