

Preface

Cisco Security Manager (Security Manager) enables you to manage security policies on Cisco devices in large, medium, or small networks. You can use shareable objects and policies in Security Manager to manage thousands of devices or only a few. Security Manager also supports multiple configuration views that are optimized for different use cases, supports the provisioning of many platform-specific settings, and provides device grouping capabilities.

Note

Cisco Security Management Suite combines Security Manager and an otherwise separate product, *Cisco Security Monitoring, Analysis, and Response System*, an appliance that enables you to monitor, identify, isolate, and counter security threats in your network. See <http://www.cisco.com/en/US/products/ps6241/index.html>.

This guide does the following:

- Lists hardware and software requirements for installing Security Manager and its related applications.
- Explains important concepts about the software applications that you select for installation and the environment in which you install them.
- Provides instructions for installing Security Manager server, Auto Update Server, Performance Monitor, and Resource Manager Essentials, and for installing dedicated client software for Security Manager.
- Describes what you must do after installation so that you can use your newly installed applications successfully.
- Guides you in understanding and troubleshooting problems that might occur during, or as a result of, installation.

Note

Before you install the applications, we recommend that—for the most recent information—you read the release notes on Cisco.com that are most relevant to the actual software components you choose to install. The release notes might contain corrections or additions to this guide or provide other information that affects planning, preparation, installation, or deployment. See [Product Documentation](#), page xi.

**Tip**

With a Cisco Self-Defending Network, security is integrated throughout the network and protects each endpoint. We recommend that you implement the best practices in the comprehensive Cisco Self-Defending Network strategy. You can learn about the Cisco Self-Defending Network at <http://www.cisco.com/go/sdn>.

Audience

This document is for network and security personnel who install, configure, deploy, and manage security infrastructure.

Conventions

This document uses the following conventions:

Item	Convention
Commands and keywords	boldface font
Variables for which you supply values	<i>italic font</i>
Displayed session and system information	screen font
Information you enter	boldface screen font
Variables you enter	<i>italic screen font</i>
Menu items and button names	boldface font
Selecting a menu item in paragraphs	Option > Network Preferences
Selecting a menu item in tables	Option > Network Preferences

**Note**

Means *reader take note*. Notes contain helpful suggestions or references to material not covered in the publication.

**Caution**

Means *reader be careful*. In this situation, you might do something that could result in equipment damage or loss of data.

**Tip**

Means *the following information will help you solve a problem*. The tips information might not be troubleshooting or even an action, but could be useful information, similar to a Timesaver.

Product Documentation

Cisco documentation and additional literature are available on Cisco.com. This section explains the product documentation resources that Cisco offers.

Security Manager, Auto Update Server, and Performance Monitor Documentation

[Table 1](#) describes available documentation for Cisco Security Manager, Auto Update Server, and Performance Monitor in the reading order that we recommend.

Table 1 *Security Manager Documentation*

Document Title	Available Formats
<i>Release Notes for Cisco Security Manager</i> Also covers Auto Update Server and Performance Monitor.	http://www.cisco.com/en/US/products/ps6498/prod_release_notes_list.html
<i>Supported Devices and Software Versions for Cisco Security Manager</i> Includes support information for Auto Update Server and Performance Monitor.	http://www.cisco.com/en/US/products/ps6498/products_device_support_tables_list.html
<i>Installation Guide for Cisco Security Manager</i> (This guide)	http://www.cisco.com/en/US/products/ps6498/prod_installation_guides_list.html
<i>User Guide for Cisco Security Manager</i>	http://www.cisco.com/en/US/products/ps6498/products_user_guide_list.html
<i>User Guide for Auto Update Server</i>	http://www.cisco.com/en/US/products/ps6498/products_user_guide_list.html
<i>User Guide for Cisco Performance Monitor</i>	http://www.cisco.com/en/US/products/ps6498/products_user_guide_list.html
Context-sensitive online help	Select an option in the GUI, then click Help .

Related Documentation

[Table 2](#) identifies important documentation for Common Services 3.3 and Resource Manager Essentials 4.3.
