

Preface

Cisco Security Manager (Security Manager) enables you to manage security policies on Cisco devices in large, medium, or small networks. You can use shareable objects and policies in Security Manager to manage thousands of devices or only a few. Security Manager also supports multiple configuration views that are optimized for different use cases, supports the provisioning of many platform-specific settings, and provides device grouping capabilities.

This guide does the following:

- Lists hardware and software requirements for installing Security Manager and its related applications.
- Explains important concepts about the software applications that you select for installation and the environment in which you install them.
- Provides instructions for installing Security Manager server and Auto Update Server and for installing dedicated client software for Security Manager.
- Describes what you must do after installation so that you can use your newly installed applications successfully.
- Guides you in understanding and troubleshooting problems that might occur during, or as a result of, installation.

Note

Before you install the applications, we recommend that—for the most recent information—you read the release notes on Cisco.com that are most relevant to the actual software components you choose to install. The release notes might contain corrections or additions to this guide or provide other information that affects planning, preparation, installation, or deployment. See [Product Documentation](#), page xi.

Audience

This document is for network and security personnel who install, configure, deploy, and manage security infrastructure.

Conventions

This document uses the following conventions:

Item	Convention
Commands and keywords	boldface font
Variables for which you supply values	<i>italic</i> font
Displayed session and system information	screen font
Information you enter	boldface screen font
Variables you enter	<i>italic screen</i> font
Menu items and button names	boldface font
Selecting a menu item in paragraphs	Option > Network Preferences
Selecting a menu item in tables	Option > Network Preferences

Note

Means *reader take note*. Notes contain helpful suggestions or references to material not covered in the publication.

Caution

Means *reader be careful*. In this situation, you might do something that could result in equipment damage or loss of data.

Tip

Means *the following information will help you solve a problem*. The tips information might not be troubleshooting or even an action, but could be useful information, similar to a Timesaver.

Product Documentation

Cisco documentation and additional literature are available on Cisco.com. [Table 1](#) describes available documentation for Cisco Security Manager and Auto Update Server in the reading order that we recommend.

Table 1 *Security Manager Documentation*

Document Title	Available Formats
<i>Release Notes for Cisco Security Manager</i> Also covers Auto Update Server.	http://www.cisco.com/c/en/us/support/security/security-manager/products-release-notes-list.html
<i>Supported Devices and Software Versions for Cisco Security Manager</i> Includes support information for Auto Update Server.	http://www.cisco.com/c/en/us/support/security/security-manager/products-device-support-tables-list.html
<i>Installation Guide for Cisco Security Manager</i> (This guide)	http://www.cisco.com/c/en/us/support/security/security-manager/products-installation-guides-list.html
<i>User Guide for Cisco Security Manager</i>	http://www.cisco.com/c/en/us/support/security/security-manager/products-user-guide-list.html
<i>User Guide for Auto Update Server</i>	http://www.cisco.com/c/en/us/support/security/security-manager/products-user-guide-list.html
Context-sensitive online help	Select an option in the GUI, then click Help .

Obtain Documentation and Submit a Service Request

For information on obtaining documentation, using the Cisco Bug Search Tool (BST), submitting a service request, and gathering additional information, see [What's New in Cisco Product Documentation](#).

To receive new and revised Cisco technical content directly to your desktop, you can subscribe to the [What's New in Cisco Product Documentation RSS feed](#). The RSS feeds are a free service.
