

# Introduction

This chapter contains the following sections:

- [What's New in this Release, on page 1](#)
- [Cisco Content Security Management Overview, on page 4](#)

## What's New in this Release

This section describes the new features and enhancements in this release of AsyncOS for Cisco Content Security Management.

**Table 1: What's New in AsyncOS 14.0**

Feature	Decsription
Enhanced Overview and Incoming Mail reporting pages	<p>The following are the enhancements made to the Incoming Mail reporting pages in the legacy web interface of your appliance:</p> <p>Incoming Mail report page:</p> <p>Added new column – Stopped by Domain Reputation Filtering in the Incoming Mail Details section.</p> <p>Changed Stopped by Reputation Filtering column name to Stopped by IP Reputation Filtering in the Incoming Mail Details section.</p> <p>For more information, see <a href="#">Using Centralized Email Security Reporting</a></p>
New System Health Status Dashboard	<p>You can now view the current status and configuration of the Web Security appliance in a page. You must choose <b>Monitoring &gt; System Health</b> to monitor the system status of the Web security appliances.</p> <p>For more information, see <a href="#">System Health Dashboard on the New Web Interface</a>.</p>

Feature	Description
Working with Certificates	<p>The appliance uses stored trusted certificate authorities to verify a certificate from a remote domain to establish the credentials of the domain. You can configure the security management appliance to use the following trusted certificate authorities:</p> <ul style="list-style-type: none"> <li>• System List</li> <li>• Custom List</li> </ul> <p>For more information, see <a href="#">Common Administrative Tasks</a></p>
Smart Licensing	<p>Cloud Service will be enabled and Appliance will be registered automatically when smart licensing is enabled and registered.</p> <ul style="list-style-type: none"> <li>• To enable or disable Cisco SecureX and Cisco Threat response, the option is introduced under the generalconfig command.</li> <li>• The command threstresponseconfig will display the warning message “Enter general config command to Enable/Disable of Cisco SecureX/Threat Response feature”.</li> <li>• The command smartaccountinfo is introduced for getting the Smart account information.</li> <li>• When you enable CloudServices, Cisco SecureX will be enabled automatically and Cisco Securex will be disabled when CloudServices is disabled.</li> </ul> <p>For more information, see Integrating with Cisco SecureX or Cisco Threat Response.</p>
Enabling Cisco SecureX or Threat Response on Content Security Gateway	<p>You must use the general configuration settings to enable Cisco SecureX or Threat Response on Content Security Gateway.</p> <p>For more information, see Integrating with Cisco SecureX or Cisco Threat Response.</p>
New report for mail policy details	<p>A new report – Mail Policy Details is added in the new web interface of your appliance. Use this report to view the number of messages that match a configured mail policy.</p> <p>For more information, see <a href="#">Using Centralized Email Security Reporting</a></p>

Feature	Description
Performing Remedial Actions on Messages in Cisco Threat Response	<p>In Cisco Threat Response, you can now investigate and apply the following remedial actions on messages processed by your appliance:</p> <ul style="list-style-type: none"> <li>• Delete</li> <li>• Forward</li> <li>• Forward and Delete</li> </ul> <p>For more information, see <a href="#">Integrating with Cisco SecureX or Cisco Threat Response</a>.</p>
Support for Internationalized Domain Name (IDN)	<p>AsyncOS 14.0 can now receive and deliver messages with email addresses that contain IDN domains. Currently, your email gateway provides support of IDN domains for the following languages only:</p> <ul style="list-style-type: none"> <li>• Indian Regional Languages: Hindi, Tamil, Telugu, Kannada, Marati, Punjabi, Malayalam, Bengali, Gujarati, Urdu, Assamese, Nepali, Bangla, Bodo, Dogri, Kashmiri, Konkani, Maithili, Manipuri, Oriya, Sanskrit, Santali, Sindhi, and Tulu.</li> <li>• European and Asian Languages: French, Russian, Japanese, German, Ukrainian, Korean, Spanish, Italian, Chinese, Dutch, Thai, Arabic, and Kazakh.</li> </ul> <p>For more information, see <a href="#">Introduction, on page 1</a></p>
SPAM Notification	<p>A new field Custom Logo Position is included that enables you to add the same logo to the SPAM notification email at the given position.</p>
Rebranded Product and Related Documentation	<p>We have rebranded the product, and related documentation from “Cisco Content Security Management” to “Cisco Secure Email and Web Manager.”</p>
Passphrases	<p>A new passphrase rule is added in your Email and Web Manager to define your login passphrase:</p> <p>For more information, see <a href="#">Common Administrative Tasks</a></p>

Feature	Description
FQDN	<p>For a X.509 certificate, the FQDN validation validates the common name field (CN) of that certificate's subject distinguished name and the subjectAltName extension of type dNSName (SAN:dNSName)</p> <p>For more information, see <a href="#">Common Administrative Tasks</a></p>

## Cisco Content Security Management Overview

AsyncOS for Cisco Content Security Management incorporates the following features:

- **External Spam Quarantine:** Hold spam and suspected spam messages for end users, and allow end users and administrators to review messages that are flagged as spam before making a final determination.
- **Centralized Policy, Virus, and Outbreak Quarantines:** Provide a single interface for managing these quarantines and the messages quarantined in them from multiple Email Security appliances. Allows you to store quarantined messages behind the firewall.
- **Centralized reporting:** Run reports on aggregated data from multiple Email and Web Security appliances. The same reporting features available on individual appliances are available on Security Management appliances.
- **Centralized tracking:** Use a single interface to track email messages and web transactions that were processed by multiple Email and Web Security appliances.
- **Centralized Configuration Management for Web Security appliances:** For simplicity and consistency, manage policy definition and policy deployment for multiple Web Security appliances.

**Note** The Security Management appliance is not involved in centralized email management, or 'clustering' of Email Security appliances.

- **Centralized Upgrade Management:** You can simultaneously upgrade multiple Web Security appliances (WSAs) using a single Security Management Appliance (SMA).
- **Backup of data:** Back up the data on your Security Management appliance, including reporting and tracking data, quarantined messages, and lists of safe and blocked senders.
- **Support for Internationalized Domain Name (IDN):** AsyncOS 14.0 can now receive and deliver messages with email addresses that contain IDN domains. Currently, your content security gateway provides support of IDN domains for the following languages only:
  - Indian Regional Languages: Hindi, Tamil, Telugu, Kannada, Marati, Punjabi, Malayalam, Bengali, Gujarati, Urdu, Assamese, Nepali, Bangla, Bodo, Dogri, Kashmiri, Konkani, Maithili, Manipuri, Oriya, Sanskrit, Santali, Sindhi, and Tulu.
  - European and Asian Languages: French, Russian, Japanese, German, Ukrainian, Korean, Spanish, Italian, Chinese, Dutch, Thai, Arabic, and Kazakh.

For this release, you can only configure few features using IDN domains in your content security gateway.

- SMTP Routes Configuration Settings- Add or edit IDN domains, Export or import SMTP routes using IDN domains.
- Reporting Configuration Settings: View IDN data - usernames, email addresses, and domains) in the reports.
- Message Tracking Configuration Settings: View IDN data- usernames, email addresses, and domains) in message tracking.
- Policy, Virus, and Outbreak Quarantine Configuration Settings: View messages with IDN domains that may be transmitting malware, as determined by the anti-virus engine, View messages with IDN domains caught by Outbreak Filters as potentially being spam or malware, View messages with IDN domains caught by message filters, content filters, and DLP message actions.
- Spam Quarantine Configuration Settings- View messages with IDN domains detected as spam or suspected spam, Add email addresses with IDN domains to the safelist and blocklist categories.

You can coordinate your security operations from a single Security Management appliance or spread the load across multiple appliances.
