Status

The **Status** menu in the Admin UI is used by administrators to view system information, such as installed system packages and their version, detailed logs, and available storage.

- About, on page 1
- Backup Details, on page 2
- Logs, on page 3
- Storage, on page 4

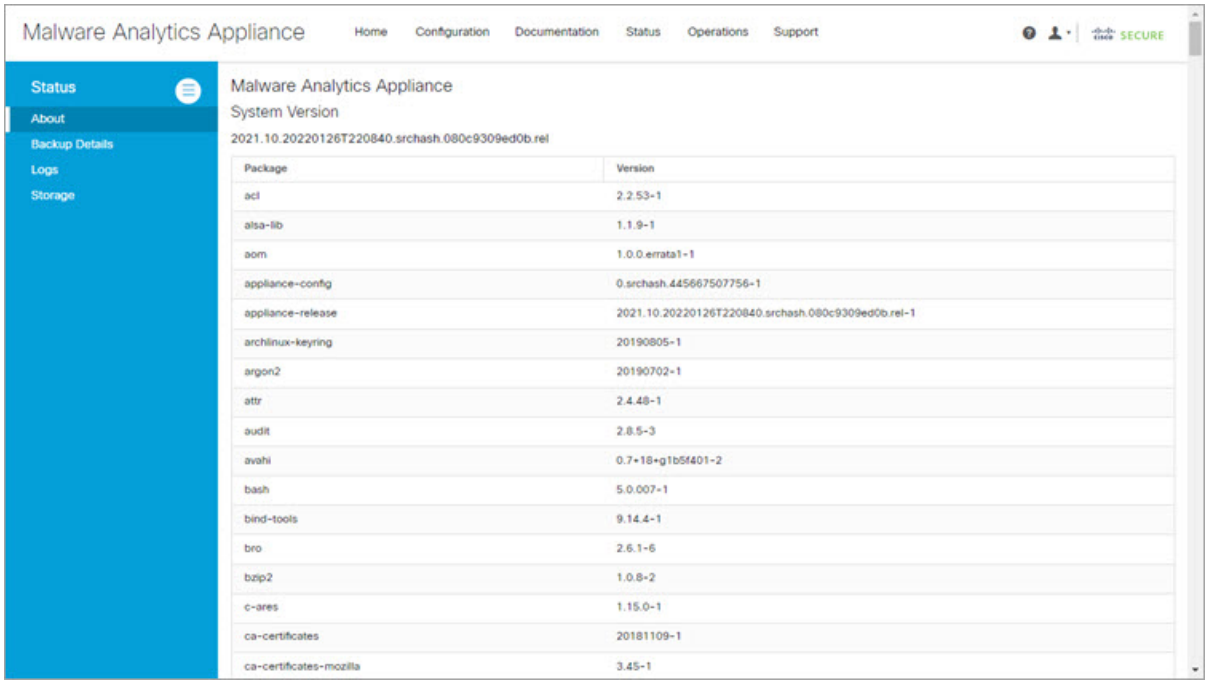
About

You can view the installed packages and their version on the **System Version** page in the Admin UI.

Procedure

Step 1 Click the **Status** tab and choose **About** to open the **System Version** page.

Figure 1: System Version



Step 2 View the packages that are installed and their versions. The release version is shown in the upper portion of the page.

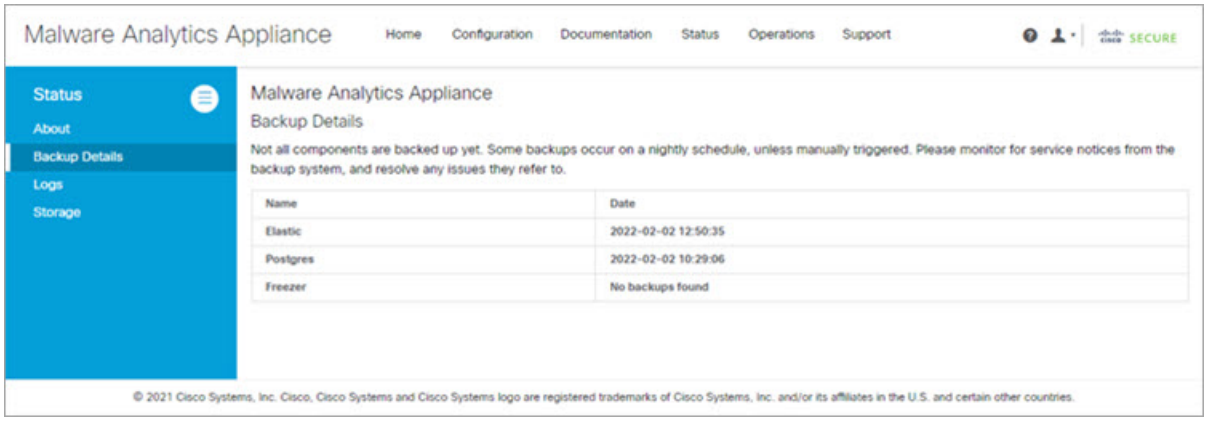
To identify the build number and corresponding release version, see the *Cisco Secure Malware Analytics Appliance Version Lookup Table*.

Backup Details

You can view detailed backup information on the **Backup Details** page, which displays the most recent time at which complete, non-incremental (where applicable) backups of PostgreSQL, Elasticsearch, and Sand Castle freezer data were successfully completed.

Click the **Status** tab and choose **Backup Details** to open the **Backup Details** page.

Figure 2: Backup Details



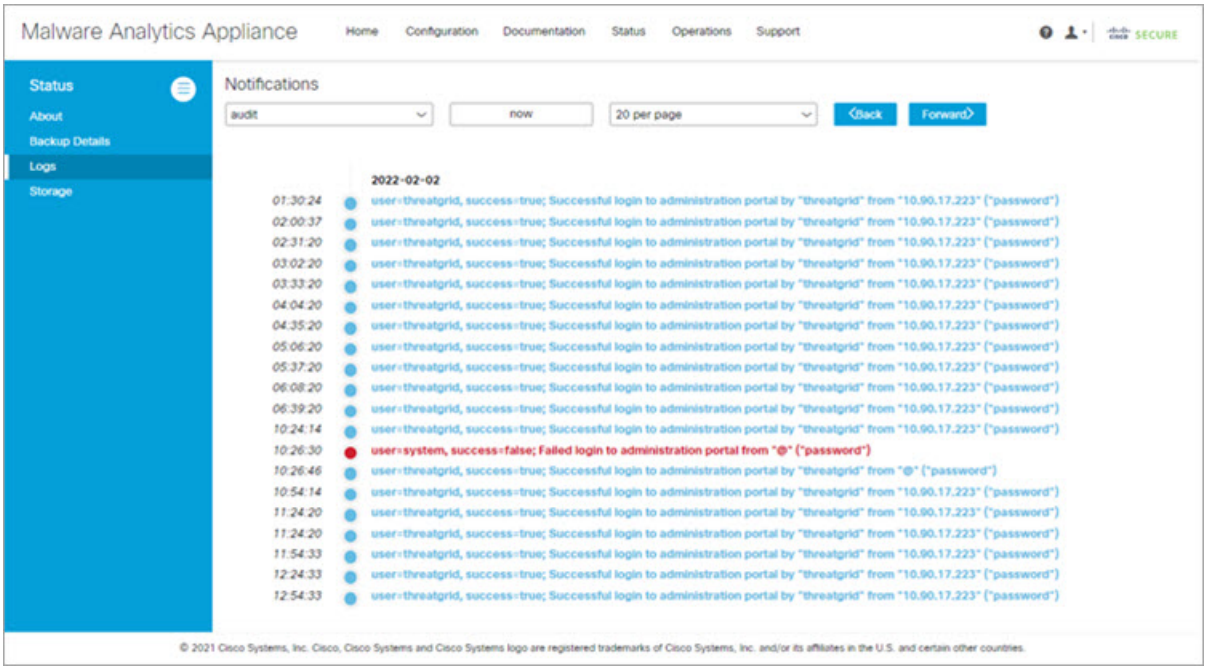
Logs

You can view detailed log information, including historical system logs, on the **Notifications** page.

Procedure

Step 1 Click the **Status** menu and choose **Logs** to open the **Notifications** page.

Figure 3: Notifications



Step 2 Filter the logs that are displayed by choosing the type of notification from the drop-down list, and specify the number of records to be displayed on the page.

Use the **Back** and **Forward** buttons to navigate between pages.

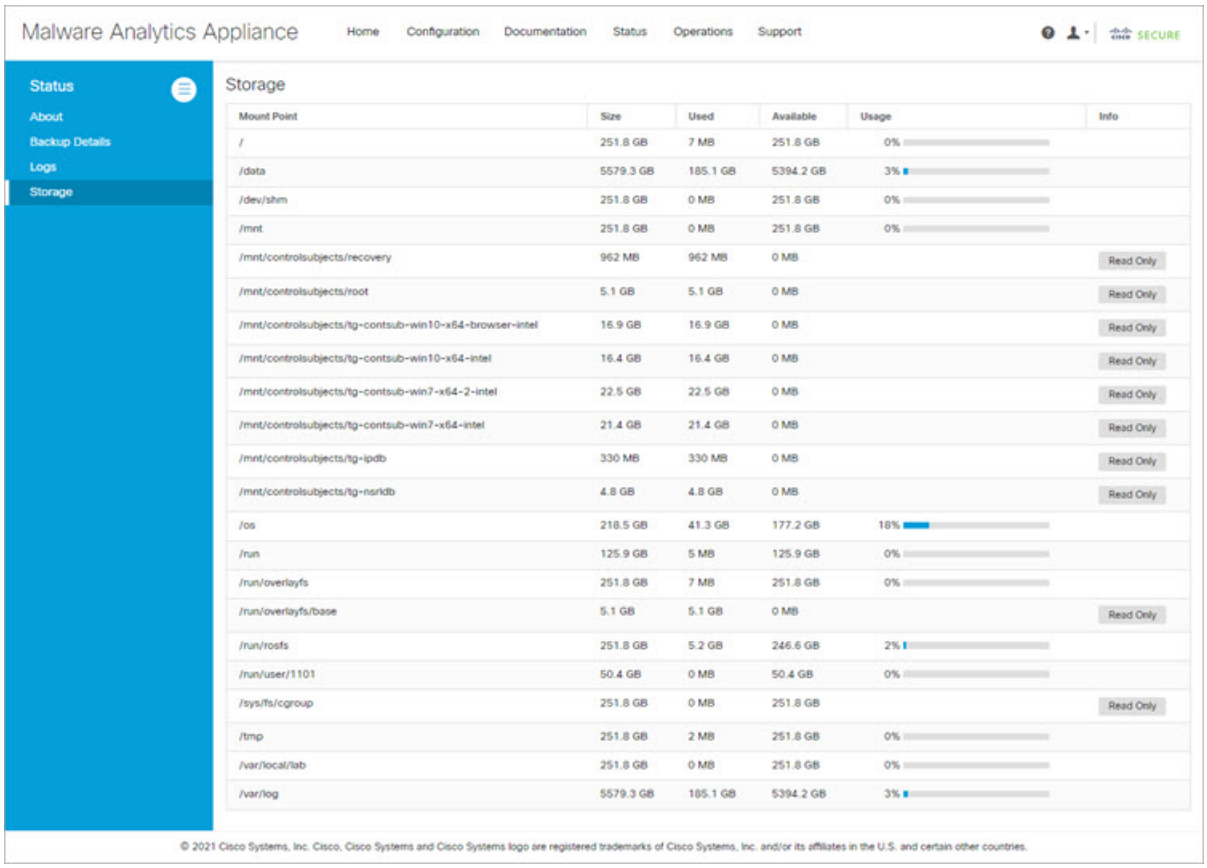
Storage

You can view the available storage on the Secure Malware Analytics Appliance from the **Storage** page.

Procedure

Step 1 Click the **Status** tab and choose **Storage**.

Figure 4: Storage



Step 2 View the size of the directories, amount of used storage, and the amount of available storage.
