

Tenants

From the navigation pane, **Site Admins** and **Customer Support users** can access the **Tenants** page under the **Platform > Tenants** menu. The Tenants page displays the currently configured Tenants and VRFs. Secure Workload is preconfigured with one or more Tenants and VRFs, and you can add, edit, and delete tenants.

Note These values affect the results of the cluster output. We recommend consulting Cisco TAC before changing these values to understand the system impact.

Add a Tenant

Before you begin

You must be a **Site Admin** or **Customer Support** user.

Procedure

Step 1 In the left navigation pane, click **Platform > Tenants**.

Step 2 Click **Create New Tenant**.

Step 3 Enter the appropriate values in the following fields:

Field	Description
Name	Enter a desired name for the tenant.
Description	(Optional) The description field contains additional information about the tenant.

Step 4 Click **Create**.

Edit a Tenant

Before you begin

You must be a **Site Admin** or **Customer Support** user.

Procedure

Step 1 In the left navigation pane, click **Platform** > **Tenants**.

Step 2 Find the tenant that you want to edit and click the **pencil** icon in the column on the right.

Field	Description
Name	Update a name for the tenant.
Description	(Optional) Update the description field contains additional information about the tenant.
VRF ID	Displays the ID for this particular Tenant or VRF.
Change log	Clicking the change log icons displays a new page which displays the change log for the Tenant or VRF.

Step 3 Click **Update**.
