

Acronyms and Abbreviations

Table A-1 defines the acronyms and abbreviations that are used in this publication.

Table A-1 *List of Acronyms and Abbreviations*

Acronym	Expansion
API	Application Program Interface
BIOS	basic input/output system
BoIB	Boot over InfiniBand
CLI	command-line interface
CMOS	configuration memory operating system
DDR	Double Data Rate
GUI	graphical user interface
GUID	globally unique identifier
HCA	Host Channel Adapter
IB	InfiniBand
IPoIB	Internet Protocol over InfiniBand
ITL	Initiator/Target/LUN
LED	light emitting diode
LFM	linear feet per minute
LU	logical unit
LUN	logical unit number
MPI	Message Passing Interface
OFED	OpenFabrics Enterprise Distribution
PCI	protocol control information
PCIe	PCI Express
SAN	Storage Area Network
SCSI	Small Computer System Interface
SDP	Sockets Direct Protocol
SDR	Single Data Rate

Table A-1 *List of Acronyms and Abbreviations (continued)*

Acronym	Expansion
SFS	Server Fabric Solution
SRP	SCSI RDMA Protocol
RDMA	Remote Direct Memory Access
uDAPL	User Direct Access Programming Library
ULP	upper-layer protocol
