Viewing Meetings

You can view all of your meetings using the calendar in the Smart+Connected MS web portal home page. For more information, see the [“Day View” section on page 2-4](#), [“Week View” section on page 2-4](#), and [“Month View” section on page 2-4](#) in Chapter 2, [“Smart+Connected MS Web Portal”](#).

The saved drafts are listed on the right hand side of the home page. For more information, see the [“Saved Drafts” section on page 2-5](#) in Chapter 2, [“Smart+Connected MS Web Portal”](#).

Note

You can also view all the meetings that you are a part of in your Microsoft Outlook calendar as the Smart+Connected MS meetings are synchronized with the Microsoft Exchange. You can accept, decline, join, edit, and delete the meetings from your mail client.

Setup/De-Setup and Services Requests

If you are the facilities administrator, you will automatically get room setup and/or de-setup requests as email invites based on the time set by the Smart+Connected MS portal administrator. These service requests are similar to the other meeting invites and appear in the calendar when you log in to the Smart+Connected MS web portal. For the resource requests that the other portal users place while they book meetings, you receive emails similar to meeting invites informing you about the item and quantity required, and the time and place where the item is required.
