

CMX System Release Notes

Revised: September 4, 2014

MSE 8.0 Role-Based Access Control

As of MSE version 8.0 it is not recommended to utilize Read Access groups on the MSE. CMX Presence Analytics currently does not participate in Role-Based Access Control (RBAC) on the MSE. Hence any userid which is part of a Read Access group will also be able to add/modify/delete CMX Presence Analytics configuration. Note that the use of only Write Access and Full Access groups means that any non-IT personnel who require access to the CMX Analytics dashboard, analytics tab, or reports may also have access to add/modify/delete CMX Analytics (location and presence) configuration. One way to mitigate some of this risk is for IT personnel to download CMX Analytics Reports and email them to non-IT personnel at regular intervals. Alternatively, the list of non-IT personnel—such as store operations managers, marketing executives, etc.—who have direct access to the MSE for CMX Analytics should be kept tightly controlled.
