## Introduction to the CMX Engage

The CMX Engage is a location intelligence, digital customer acquisition and multi-channel engagement platform that enables companies to connect, know, and engage with visitors at their physical business locations.

The major features of the CMX Engage 3.2.6 release are as follows:

- No longer capture the data such as profile URL, profile image, and so on for social authentication.
- Captures FB access token for Facebook authentication.
- Upgraded the client side framework to RiotJS to optimize the captive portal loading speed.

# Enhancements

## CMX Engage Runtime

- [Social Authentication, page 2](#)
- [Client Side Optimization, page 2](#)

## CMX Engage Runtime

The following enhancements are made to the CMX Engage Runtime:

### Social Authentication

For Social authentication, the following changes are made:

- Removed the fields such as profile URL, profile image, and so on for the social subscriber data and acquisition logs.
- Added FB access token to subscriber data and acquisition logs.

### Client Side Optimization

For the captive portals, upgraded the client side framework to RiotJS for optimizing the captive portal loading speed.

## Resolved Issues

**Table 1** *Resolved Issues in the CMX Engage 3.2.6*

Description
<b>CMX Engage Dashboard</b>
On editing a group, the group ID created for that group is removed.
If CMX SSID is available, cannot import a Meraki SSID with the same name.
Cannot import a SSID name that starts or ends with a pipe character.
For SMS notifications, space in the text editor is considered as unicode character.

# Open Issues

**Table 2**      *Open Issues in the CMX Engage 3.2.6*

Description
There are no open issues for this release.

## Support

You can access the support documentation using the Help button in the CMX Engage Dashboard.
