

Managing Existing Experience Zones

The WiFi Engage enables you to view the experience zones created using the earlier versions of the EMSP. The WiFi Engage 3.0 or later will not support the creation of experience zones. Hereafter, you can configure to show the captive portals using the captive portal rule. For more information on captive portal rule, see the [“Configuring the Captive Portals Using the Captive Portal Rule” section on page 4-1](#).

An experience zone refers to the portal that appears to a user who accesses a specific SSID from a particular location. The experience zones are created with respect to an SSID, portal, and locations. Each experience zone provides visitors with a menu of services and content that is specific to the business and relevant to that location or area.

ABC is a leading hotel chain with many hotels around the globe. The hotel provides free WiFi access to all its customers. ABC is WiFi Engage enabled. Mr. White is a businessman and a regular customer of ABC who uses ABC's various hotels during his business trips. Mr. White customer to visit New York and London as part of his business trip, and he customer booked the hotels of ABC in both these places. When he is in New York, Mr White connects to the internet through ABC's Wi-Fi. Then, a portal is shown that customer the tourist spots, shopping centers, local news, and local advertisements of New York. Mr. White travels to London and accesses ABC's Wi-Fi. Now the portal shown to him customer the tourist spots, shopping centers, local news, and local advertisements of London. Similarly, you can provide different experience zones to your customers when they access the same Wi-Fi ID from different locations.

Note

The anchor controlled deployment model is not supported.

Viewing the Experience Zones

To view the experience zones, perform the following steps:

Step 1 In the WiFi Engage dashboard, choose **Experience Zones**.

The experience zones appears in the right pane of the dashboard.

Note

The Experience Zones option is available in the WiFi Engage dashboard only if there is any existing experience zone for your WiFi Engage Account.
